## INTRODUCTION

The data presented here is based on the results of the provincewide *Relance Survey of College Graduates – Technical Training*, conducted by the Ministère de l'Éducation et de l'Enseignement supérieur. The survey carried out in 2018 concerns the graduating class of 2016-2017. The surveys carried out in 2016 and 2014 concerned the graduating classes of 2014-2015 and 2012-2013, respectively.

The purpose of this survey is to provide an accurate picture of the situation of graduates from college-level technical training programs approximately 10 months after they have earned a Diploma of College Studies (DCS). It meets a need for accurate, relevant information on how well recent graduates are faring on the labour market.

For further information on the programs covered in this brochure or on related matters, please refer to the other Relance survey documents available on the Ministère's website at the following address: <http://www.education.gouv.qc.ca/en/references/indicateurs-et-statistiques/enseignement-superieur/relance-surveys>.

## HIGHLIGHTS

Some **highlights** from the 2018 survey (describing the situation as of March 31, 2018):

- On March 31, 2018, approximately 10 months after they had earned a diploma, the situation of individuals who graduated in 2016-2017 with a Diploma of College Studies (DCS) from a technical training program was as follows: 62.7% were employed, 2.3% were looking for work, 33.5% were pursuing their studies and 1.5% were considered persons not in the labour force. Compared with 2016, the proportion of people in the labour market has increased by 3.5 percentage points.
- Among employed graduates, 83.5% reported working in their field of study. This proportion was 85.1% for women, which is 5 percentage points higher than men (80.2%). However, the number of women who were working full-time was 80.6%, which is 7.3 percentage points lower than men (87.9%).
- The unemployment rate was measured at 3.6%, lower than in the 2016 survey. For men, the rate was 5.1%, compared with 2.8% for women (a 2.3-point difference). This difference has remained relatively stable for the last two surveys.
- The average gross hourly salary for graduates employed in their field of study increased slightly compared to 2014 and 2016. The 2018 average is close to \$21 per hour. The average gross hourly salary for men was \$21.67 compared with \$20.64 for women, which represents a difference similar to that observed in 2014.

## GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

### AVERAGE AGE OF GRADUATES

Refers to the average age on July 1, 2017.

### AVERAGE GROSS HOURLY SALARY

Refers to the average gross hourly income earned by workers during one normal week of work. The data reflects only graduates working for an employer and who declared their work was connected to the diploma earned.

### AVERAGE PLACEMENT IN A JOB RELATED TO THE DIPLOMA EARNED

Refers to the number of graduates working a job related to the diploma earned expressed as a percentage of the number of graduates working in a job or seeking employment, calculated based on the last three Relance surveys.

### CHANGE SINCE 2012 IN PLACEMENT IN A JOB RELATED TO THE DIPLOMA EARNED

Refers to the trend since 2012 in the number of graduates with a job related to the diploma earned, based on data from the last five surveys.

### EMPLOYED

Refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

### INACTIVE

Refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

### MATCHING TRAINING AND LABOUR REQUIREMENTS

Refers to optimal balance between the number of individuals trained in a technical field and the needs of the labour market, determined by employment growth and replacement of the workforce. A program that has a deficit means there is a shortage of individuals with diplomas that respond to the needs of the labour market, and a program that has a surplus means there are more individuals with diplomas than required to respond to the needs of the labour market.

### PERMANENT PAYROLL EMPLOYMENT

Refers to a full-time payroll-employment job held by a graduate for which there is no indication that it will end on a determined date. This proportion is calculated based only on graduates holding a payroll-employment job connected to their field of study.

**RESPONSE RATE**

Refers to the number of target graduates who responded to the questionnaire as a percentage of the total number of target graduates.

**SEEKING EMPLOYMENT**

Refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

**STRONG SENSE OF COMPETENCY DURING WORK**

Refers to graduates who state that they feel strongly that the skills acquired while earning their diploma has given them the ability to complete their work tasks. This proportion is calculated based only on graduates holding a payroll employment job connected to their field of study.

**STUDYING**

Refers to target graduates who stated they were either studying full-time or part-time, and not working.

**STUDYING IN RELATED FIELD**

Refers to graduates who consider their studies to be connected to the diploma earned.

**TARGET GRADUATES**

Refers to all holders of a Diploma of College Studies (DCS) who graduated from a technical training program during the academic year preceding the survey year.

**UNEMPLOYMENT RATE**

Refers to the number of graduates seeking employment expressed as a percentage of the labour force (which includes only those who are employed and those who are seeking employment).

**WORKING FULL-TIME**

Refers to graduates working full-time (self-employed or working for an employer), generally 30 hours or more per week, in a job connected to their field of study.

**WORKING IN RELATED FIELD**

Refers to graduates who consider their job (self-employed or working for an employer) to be connected to their field of study.

**WORKING PART-TIME**

Refers to graduates working part-time (self-employed or working for an employer), generally less than 30 hours per week, in a job connected to their field of study. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

## HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2018 *Relance Survey of College Graduates – Technical Training* to illustrate how the main terms are used in the tables. The proportions of the four main situations (employed, seeking employment, studying, inactive) can be added together and total 100% of the respondents, as do the proportions for full-time and part-time work.

### Calculation example: Results of the 2018 survey of graduates with a DCS (SITUATION ON MARCH 31)

	NUMBER	%	CALCULATION (if available)
Number of graduates targeted by the survey (size of the population)	18 470		
Total number of people who responded to the questionnaire	13 215	100.0	
Employed	8 288	62.7	8 288 / 13 215
Employed in a job related to the diploma earned	6 919	83.5	6 919 / 8 288
• full-time (working for an employer or self-employed)	5 739	82.9	5 739 / 6 919
• part-time (working for an employer or self-employed)	1 180	17.1	1 180 / 6 919
• permanent employment (working for an employer only)	5 205	78.6	
• strong sense of competency (working for an employer only)	3 675	55.8	
• hourly salary (working for an employer only)	-	-	
Seeking employment	307	2.3	307 / 13 215
Studying	4 423	33.5	4 423 / 13 215
• in related field	3 918	88.6	3 918 / 4 423
Inactive	197	1.5	197 / 13 215
Unemployment rate		3.6	307 / (8 288 + 307)

1. This information is not available for self-employed graduates.

2. More than 50% of graduates from the Acupuncture (112.A0) and Denturology (110.B0) programs are self employed.

3. A program that has a deficit means there is a shortage of individuals with diplomas that respond to the needs of the labour market, and a program that has a surplus means there are more individuals with diplomas than required to respond to the needs of the labour market.

x. Unavailable or confidential data

## NOTES ON THE TABLE

- 1 Given the confidential nature of the data and a concern for maintaining the anonymity of the respondents, results for programs with fewer than five graduates are not presented here.
- 2 The results are not presented for programs where the response rate does not meet publication requirements.
- 3 Results for programs with a small number of graduates should be interpreted with caution.
- 4 The programs have been grouped according to their most recent codes. However, the results take into consideration data pertaining to the earlier corresponding programs.
- 5 An “x” indicates that the data must remain confidential.
- 6 A “-” indicates that the data is not applicable.
