## INTRODUCTION

The data presented here are based on the results of the provincewide *Relance Survey of College Graduates – Technical Training*, conducted annually by the Ministère de l'Enseignement supérieur, de la Recherche, de la Science et de la Technologie (MESRST). The survey carried out in 2012 concerns the graduating class of 2010-2011. The surveys carried out in 2011 and 2010 concerned the graduating classes of 2009-2010 and 2008-2009, respectively.

The purpose of this survey is to provide an accurate picture of the situation of graduates from college-level technical training programs approximately 10 months after they have earned a Diploma of College Studies (DCS). It meets a need for accurate, relevant information on how well recent graduates are faring on the labour market, just as the other two *Relance* surveys do in the case of graduates from university and secondary school vocational training programs.

For further information on the programs covered in this brochure or on related matters, please refer to the other *Relance* survey documents available on the Ministère's Web site.

## HIGHLIGHTS

Some **highlights** from the 2012 survey (describing the situation as of March 31, 2012):

- On March 31, 2012, approximately 10 months after they have earned a diploma, the situation of individuals who graduated in 2010-2011 with a Diploma of College Studies (DCS) from a technical training program was as follows: 63.5% were employed, 2.5% were looking for work, 32.0% were pursuing their studies and 2.0% were considered persons not in the labour force.
- Among employed graduates, 84.7% were working full-time (30 or more hours per week). This proportion was 89.5% for men and 82.2% for women, representing a difference of 7.3 percentage points in favour of men.
- Among people working full-time, 83.4% reported that their job was related to their program of study. This proportion stood at 77.7% for men compared with 86.4% for women, representing a difference of 8.7 percentage points.
- On March 31, 2012, 32.0% of students were pursuing their studies, compared with 30.0% in 2011 (a 2 percentage points increase). Of the graduates surveyed in 2012, 37.9% of men and 28.5% of women were still in school, compared with 35.6% and 26.5%, respectively, in 2011.
- Among graduates who are pursuing studies, 88.0% reported that their current studies were related to their initial training. This proportion has remained above 86.0% for the last several years.
- The unemployment rate for graduates holding a DCS in technical training rose from 3.4% in 2011 to 3.7% in 2012. The unemployment rate for men was 5.3%, compared with 2.9% for women (a 2.4-points difference). The unemployment rate has remained consistently lower than that of the Québec labour force as a whole, which was 8.8% on March 31, 2012.
- The average gross weekly salary for graduates holding a DCS in technical training and working full-time was \$699 in 2012 compared with \$686 in 2011 (a 1.9% increase). The average gross weekly salary for men was \$755, compared with \$668 for women.

## GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

### TARGET GRADUATES

"Target graduates" refers to all holders of a Diploma of College Studies (DCS) who graduated from a technical training program during the academic year preceding the survey year.

### EMPLOYED

"Employed" refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

### SEEKING EMPLOYMENT

"Seeking employment" refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

### STUDYING

"Studying" refers to target graduates who stated they were either studying full-time or part-time, and not working.

### INACTIVE

"Inactive" refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

### UNEMPLOYMENT RATE (UNEMPLOYED)

"Unemployment rate (unemployed)" refers to the number of graduates seeking employment compared with the number of people in the labour force (which includes people who are employed and people who are seeking employment).

### WORKING FULL-TIME

"Working full-time" refers to graduates working full-time, i.e. generally 30 hours or more per week.

### WORKING PART-TIME

"Working part-time" refers to graduates working part-time, i.e. generally less than 30 hours per week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

### AVERAGE GROSS WEEKLY SALARY

"Average gross weekly salary" represents the average gross income earned by workers for one week of full-time work. The data reflect only graduates working for an employer.

### WORKING IN RELATED FIELD

"Working in related field" refers to graduates working full-time who consider their job to be connected to their field of study.

### STUDYING IN RELATED FIELD

"Studying in related field" refers to graduates who feel that their studies are connected to the diploma obtained.

## HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2012 *Reliance Survey of College Graduates – Technical Training* to illustrate the application of the definitions of the main terms used in the tables.

### Calculation example: Results of the 2012 survey of graduates with a DCS

	Number	%	Calculation
Number of graduates targeted by the survey (size of the population)	17 282		
Total number of graduates who completed the questionnaire	12 091	100.0	
Employed	7 677	63.5	7 677 / 12 091
• full-time	6 500	84.7	6 500 / 7 677
- in related field	5 418	83.4	5 418 / 6 500
Seeking employment	298	2.5	298 / 12 091
Studying	3 870	32.0	3 870 / 12 091
- in related field	3 407	88.0	3 407 / 3 870
Inactive	246	2.0	246 / 12 091
Unemployment rate	298	3.7	298 / (7 677 + 298)

## OVERALL RESULTS

## NOTES

1. Given the confidential nature of the data and a concern for maintaining the anonymity of the respondents, results for programs for which the number of graduates is less than five are not presented here. A list of these programs can be consulted in the survey report.
2. In cases where the response rate does not meet publication requirements, the results are not presented. A list of these programs can be consulted in the analysis document.
3. Because of the small number of graduates in certain programs, results in such cases should be interpreted with caution.
4. The programs have been classified according to their most recent codes. However, the results take into consideration data pertaining to the corresponding earlier programs.
5. The abbreviation "n.a." indicates that the data are not available.
6. An "x" indicates that the data must remain confidential.
