INTRODUCTION

The data presented here are based on the results of the provincewide *Relance Survey of College Graduates – Technical Training*, conducted annually by the Ministère de l'Éducation, de l'Enseignement supérieur et de la Recherche. The survey carried out in 2014 concerns the graduating class of 2012-2013. The surveys carried out in 2013 and 2012 concerned the graduating classes of 2011-2012 and 2010-2011, respectively.

The purpose of this survey is to provide an accurate picture of the situation of graduates from college-level technical training programs approximately 10 months after they have earned a Diploma of College Studies (DCS). It meets a need for accurate, relevant information on how well recent graduates are faring on the labour market.

Previous surveys were carried out exclusively by telephone, but the graduates targeted by the 2014 survey had the option of completing the questionnaire online. More than a quarter of the respondents chose this option, and we believe that this could partially explain certain discrepancies with the results from previous surveys.

For further information on the programs covered in this brochure or on related matters, please refer to the other *Relance* survey documents available on the Ministère's Web site (www.mesrs.gouv.qc.ca/relance).

HIGHLIGHTS

Some **highlights** from the 2014 survey (describing the situation as of March 31, 2014):

- On March 31, 2014, approximately 10 months after they have earned a diploma, the situation of individuals who graduated in 2012-2013 with a Diploma of College Studies (DCS) from a technical training program was as follows: 61.1% were employed, 3.1% were looking for work, 33.9% were pursuing their studies and 1.9% were considered persons not in the labour force. Compared with 2013, the proportion of women in the labour market has decreased by 3.9 percentage points, while the proportion pursuing their studies has increased by 3.5%.
- Among employed graduates (61.1%), 81.1% were working full-time (30 or more hours per week). This proportion was 87.9% for men and 77.4% for women, representing a difference of 10.5 percentage points in favour of men, or an increase in the gap between men and women of almost 4 percentage points.
- Among people working full-time, 82.8% reported that their job was related to their field of study. This proportion stood at 79.2% for men and 85.1% for women, representing a difference of 5.9 percentage points. This difference has decreased in relation to 2013.
- On March 31, 2014, 33.9% of students were pursuing their studies, compared with 30.5% in 2013 (an increase of 3.4 percentage points). Of the graduates surveyed in 2014, 38.6% of men and 30.9% of women were still in school, compared with 35.5% and 27.4%, respectively, in 2013.
- Among graduates pursuing studies, 86.7% reported that their current studies were related to their initial training. This proportion has remained high for the last several years.
- As of March 31, 2014, the unemployment rate for graduates holding a DCS in technical training was 4.9%. The unemployment rate for men was 6.7%, compared with 3.9% for women (a 2.8-point difference). The unemployment rate has remained consistently much lower than that of the Québec labour force as a whole, which was 8.7% (not seasonally adjusted) on March 31, 2014.
- The average gross weekly salary for graduates holding a DCS in technical training and working full-time was \$719 in 2014, compared with \$714 in 2013 (a sign of relative stability). The average gross weekly salary for men was \$786, compared with \$678 for women, which represents a greater difference than that observed between 2012 and 2013.

GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

TARGET GRADUATES

“Target graduates” refers to all holders of a Diploma of College Studies (DCS) who graduated from a technical training program during the academic year preceding the survey year.

RESPONSE RATE

“Response rate” refers to the number of target graduates who responded to the questionnaire as a percentage of the total number of target graduates.

AVERAGE AGE OF GRADUATES

“Average age of graduates” refers to the average age on July 1, 2013.

EMPLOYED

“Employed” refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

SEEKING EMPLOYMENT

“Seeking employment” refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

STUDYING

“Studying” refers to target graduates who stated they were either studying full-time or part-time, and not working.

INACTIVE

“Inactive” refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

UNEMPLOYMENT RATE (UNEMPLOYED)

“Unemployment rate (unemployed)” refers to the number of graduates seeking employment compared with the number of people in the labour force (which includes people who are employed and people who are seeking employment).

WORKING FULL-TIME

“Working full-time” refers to graduates working full-time, i.e, generally 30 hours or more per week.

SELF-EMPLOYED

“Self-employed” refers to graduates who stated they were self-employed full-time and did not hold a full-time payroll-employment position.

PERMANENT PAYROLL EMPLOYMENT

“Permanent payroll employment” refers to a full-time payroll-employment position held by a graduate for which there is no indication that it will end on a determined date. This proportion is calculated based only on graduates holding a full-time payroll-employment position.

WORKING PART-TIME

“Working part-time” refers to graduates working part-time, i.e, generally less than 30 hours per week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

PAYROLL EMPLOYMENT - HOURS WORKED

“Payroll employment - hours worked” refers to the average number of hours worked by graduates employed full-time during a normal work week. The data reflect only graduates working for an employer.

AVERAGE GROSS WEEKLY SALARY

“Average gross weekly salary” represents the average gross income earned by workers for one normal week of full-time work. The data reflect only graduates working for an employer.

WORKING IN RELATED FIELD

“Working in related field” refers to graduates working full-time who consider their job to be connected to their field of study.

STUDYING IN RELATED FIELD

“Studying in related field “ refers to graduates who feel that their studies are connected to the diploma earned.

HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2014 *Relance Survey of College Graduates – Technical Training* to illustrate the application of the definitions of the main terms used in the tables. Among the variables presented in this brochure, only the proportions of the four main situations (employed, seeking employment, studying, inactive) can be added together and total 100% of the respondents.

Calculation example: Results of the 2014 survey of graduates with a DCS (Situation on March 31)

	NUMBER	%	CALCULATION
Number of graduates targeted by the survey (size of the population)	18 947		
Total number of people who responded to the questionnaire	13 775	100.0	
Employed	8 416	61.1	$8\ 416 / 13\ 775$
• full-time (payroll employment or self-employment)	6 827	81.1	$6\ 827 / 8\ 416$
> payroll employment	6 632	-	
> permanent payroll employment	5 338	80.5	$5\ 338 / 6\ 632$
> self-employment (without payroll employment)	195	2.9	$195 / 6\ 827$
> working in related field	5 654	82.8	$5\ 654 / 6\ 827$
Seeking employment	433	3.1	$433 / 13\ 775$
Studying	4 665	33.9	$4\ 665 / 13\ 775$
> working in related field	4 046	86.7	$4\ 046 / 4\ 665$
Inactive	259	1.9	$259 / 13\ 775$
Unemployment rate		4.9	$433 / (8\ 416 + 433)$

NOTES

- 1 Given the confidential nature of the data and a concern for maintaining the anonymity of the respondents, results for programs for which the number of graduates is less than five are not presented here. A list of these programs can be consulted in the survey report.
- 2 The results are not presented for programs where the response rate does not meet publication requirements. A list of these programs can be consulted in the survey report.
- 3 Results for programs with a small number of graduates should be interpreted with caution.
- 4 The programs have been grouped according to their most recent codes. However, the results take into consideration data pertaining to the earlier corresponding programs.
- 5 The abbreviation “n.a.” indicates that the data are not available.
- 6 An “x” indicates that the data must remain confidential.
