INTRODUCTION

The data presented here are based on the results of the province-wide *Relance* survey of university graduates conducted across Québec every two years by the Ministère de l'Éducation, du Loisir et du Sport (MELS).

The purpose of this survey is to provide an accurate picture of the situation of university graduates—during the reference week—approximately 20 months after they earn a degree. It meets a need for accurate, relevant information on how well recent graduates are faring on the labour market, just as the other two *Relance* surveys do in the case of graduates of secondary school programs and college-level training programs.

For further information on the disciplines listed in this brochure or on other groupings of disciplines, please refer to the various documents related to the *Relance* surveys that are available on the MELS Web site at:

<<http://www.mels.gouv.qc.ca/Relance/Relance.htm>>.

HIGHLIGHTS

The **highlights** (situation in January) are mainly taken from the tables of overall results in the Relance brochures. They are as follows :

- Approximately 20 months after having earned a degree, the employment rate for university graduates during the week of January 21 to 27, 2007, was 69.7% for those holding a bachelor's degree, and 75.2% for those with a master's. In 2005 and 2003, employment rates for those with a bachelor's were 68.1% and 70.4% respectively, and 73.5% and 76.2% for a master's.
- The proportion of persons holding a bachelor's degree who were pursuing their studies during the week of January 21 to 27, 2007, was 24.5%, compared with 18.4% for those with a master's. After successive increases in 2001, 2003 and 2005, this proportion appears to have levelled off for both bachelor's and master's graduates.
- Employment rates in 2007 for those with a bachelor's degree in the fields of *Education Sciences*, *Administrative Sciences* and *Applied Sciences* were higher than the average. Among those with a master's degree, a higher employment rate was recorded in the field of *Administrative Sciences*.
- The unemployment rate for those with a bachelor's degree rose from 4.9% in 2003 to 5.3% in 2005, and then dropped by 1.3% to stand at 4.0% in 2007, a return to the unemployment rate of 2001. Among those with a master's degree, the unemployment rate increased from 4.6% in 2003 to 5.7% in 2005, to settle at 4.4% in 2007. Over the years, these unemployment rates have remained below the general unemployment rates for the active population in Québec. In January 2007, the rate stood at 7.7%.

- In 2007, the lowest unemployment rates were found among those with a bachelor's degree in the fields of *Health Sciences*, *Education Sciences* and *Administrative Sciences*. Master's graduates experienced the lowest unemployment rates in the fields of *Health Sciences*, *Education Sciences*, *Administrative Sciences* and *Literature*.
- A total of 88.6% of graduates with a bachelor's degree and 91.6% of those with a master's were working full-time (30 or more hours per week). These figures are comparable to those of 2003 and 2005.
- In January 2007, 81.0% of graduates with a bachelor's degree and 83.8% of those with a master's who were working full-time said their work was related to their training. In 2005, the corresponding rates were 79.8% and 83.6%, respectively.
- Among graduates with a bachelor's or master's degree, women employed full-time earned a lower average gross weekly salary than men: \$770 compared to \$858 for those with a bachelor's; and \$1 012 compared to \$1 153 for those with a master's.

GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

TARGET GRADUATES

“Target graduates” refers to all holders of a bachelor’s or master’s degree who received their degree during the calendar year two years preceding the survey year.

EMPLOYED

“Employed” refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

SEEKING EMPLOYMENT

“Seeking employment” refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

STUDYING

“Studying” refers to target graduates who stated they were either studying full-time or part-time, and not working.

INACTIVE

“Inactive” refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

UNEMPLOYMENT RATE (UNEMPLOYED)

“Unemployment rate (unemployed)” refers to the number of graduates seeking employment compared with the number of people in the labour force (which includes people who are employed and people who are seeking employment).

WORKING FULL-TIME

“Working full-time” refers to graduates working full-time, i.e. generally 30 hours or more per week.

WORKING PART-TIME

“Working part-time” refers to graduates working part-time, i.e. generally less than 30 hours per week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

AVERAGE GROSS WEEKLY SALARY

“Average gross weekly salary” represents the average gross income earned by workers for one week of full-time work. The data reflect only graduates working for an employer.

WORKING IN RELATED FIELD

“Working in related field” refers to graduates working full-time who consider their job to be connected to their field of study.

STUDYING IN RELATED FIELD

“Studying in related field” refers to graduates who feel that their studies are connected to the diploma obtained.

REFERENCE WEEKS

The data are grouped according to reference weeks, being those of January 21 to 27, 2007, January 16 to 22, 2005, and January 19 to 25, 2003.

HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2007 *Relance* survey of university graduates to illustrate the application of the definitions of the main terms used in the tables.

Calculation example: Results of the 2007 survey of graduates with a bachelor's degree

	Number	%	Calculation
Number of graduates targeted by the survey (size of the population)	28 917		
Total number of graduates who completed the questionnaire	18 525	100.0	
Employed	12 907	69.7	$12\,907 / 18\,525$
• full-time	11 431	88.6	$11\,431 / 12\,907$
- in related field	9 261	81.0	$9\,261 / 11\,431$
Seeking employment	538	2.9	$538 / 18\,525$
Studying	4 537	24.5	$4\,537 / 18\,525$
- in related field	3 831	84.4	$3\,831 / 4\,537$
Inactive	543	2.9	$543 / 18\,525$
Unemployment rate		4.0	$538 / (12\,907 + 538)$

OVERALL RESULTS

Employment situation of graduates with a degree in January of the year of the survey

 SITUATION IN 2003

NOTES ON TABLES

1. Given the confidential nature of the data and a concern for maintaining the anonymity of the respondents, results for disciplines for which the number of graduates is less than five are not presented here. A list of these disciplines can be consulted in the survey report.
2. The results for which the response rate does not meet publication requirements are not presented. A list of these disciplines can be consulted in the survey report.
3. Because of the small number of graduates in certain disciplines, results in such cases should be interpreted with caution.
4. Results regarding the disciplines are presented according to the discipline codes established under the *CLASS* classification system.
5. The abbreviation “n.a.” indicates that the data are not available.
6. An “x” indicates that the data must remain confidential.
