INTRODUCTION

The data presented here are based on the results of the province-wide *Relance survey* of university graduates conducted across Québec every two years by the Ministère de l'Éducation, du Loisir et du Sport (MELS).

The purpose of this survey is to provide an accurate picture of the situation of university graduates—during the reference week—approximately 20 months after they earn a degree. It meets a need for accurate, relevant information on how well recent graduates are faring on the labour market, just as the other two *Relance surveys* do in the case of graduates of secondary school programs and college-level training programs.

For further information on the disciplines listed in this brochure or on other groupings of disciplines, please refer to the various documents related to the *Relance survey* that are available on the MELS Web site at:

(<http://www.mels.gouv.qc.ca/Relance>).

HIGHLIGHTS

The **highlights** (situation in January) are mainly taken from the tables of overall results in the Relance brochures. They are as follows :

- During the week of January 18 to 24, 2009, approximately 20 months after graduation, 69.8% of graduates with a bachelor's degree and 78.7% of graduates with a master's degree were working full-time or part-time. In 2007 and 2005, the employment rates were, respectively, 69.7% and 68.1% for graduates with a bachelor's degree and 75.2% and 73.5% for graduates with a master's degree.
- During the week of January 18 to 24, 2009, the proportion of graduates with a bachelor's degree pursuing their studies was 24.2%, compared with 15.1% of graduates with a master's degree. The rate for graduates with a bachelor's degree appears to have stabilized since 2007, after showing steady growth in 2001, 2003 and 2005. However, the rate for graduates with a master's degree is the lowest recorded since 2001.
- The proportion of employed graduates holding a bachelor's degree in education, business administration or applied sciences was higher than average, standing at 88.3%, 84.4% and 76.6%, respectively. Above average employment rates were recorded among graduates holding a master's degree: the rate for graduates in business administration stood at 89.7%; in law, 88.7%; and in education, 81.2%.
- The unemployment rate for graduates holding a bachelor's degree was 5.3% in 2005, 4.0% in 2007 and 4.5% in 2009. For graduates holding a master's degree, however, the unemployment rate dropped from 5.7% in 2005 to 4.4% in 2007, and finally to 4.2% in 2009. These rates have remained consistently lower than that of the Québec labour force as a whole, which was 9% in January 2009.

- In 2009, the unemployment rates for graduates holding a bachelor's degree in health sciences, education, business administration or applied sciences were the lowest recorded, standing at 0.7%, 2.0%, 4.3% and 4.5%, respectively. For graduates holding a master's degree, the unemployment rate was 1.8% in education, 2.7% in health sciences, 3.1% in law and 3.4% in business administration and literature.
- Among the employed graduates, 88.6% of graduates with a bachelor's degree and 91.1% of graduates with a master's degree were working full-time (30 or more hours a week). These results are comparable with those recorded in 2005 and 2007.
- In January 2009, 82.1% of graduates holding a bachelor's degree and 85.8% of those holding a master's degree were working full-time in a job related to their field of study. In 2007, these rates stood at 81.0% for graduates holding a bachelor's degree and 83.8% for graduates holding a master's degree.
- Among the graduates holding a bachelor's or a master's degree, women who were gainfully employed and working full-time received a lower average gross weekly salary than men, respectively earning \$827 versus \$908 with a bachelor's degree, and \$1 069 versus \$1 188 with a master's degree.

GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

TARGET GRADUATES

"Target graduates" refers to all holders of a bachelor's or master's degree who received their degree during the calendar year two years preceding the survey year.

EMPLOYED

"Employed" refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

SEEKING EMPLOYMENT

"Seeking employment" refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

STUDYING

"Studying" refers to target graduates who stated they were either studying full-time or part-time, and not working.

INACTIVE

"Inactive" refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

UNEMPLOYMENT RATE (UNEMPLOYED)

“Unemployment rate (unemployed)” refers to the number of graduates seeking employment compared with the number of people in the labour force (which includes people who are employed and people who are seeking employment).

WORKING FULL-TIME

“Working full-time” refers to graduates working full-time, i.e. generally 30 hours or more per week.

WORKING PART-TIME

“Working part-time” refers to graduates working part-time, i.e. generally less than 30 hours per week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

AVERAGE GROSS WEEKLY SALARY

“Average gross weekly salary” represents the average gross income earned by workers for one week of full-time work. The data reflect only graduates working for an employer.

WORKING IN RELATED FIELD

“Working in related field” refers to graduates working full-time who consider their job to be connected to their field of study.

STUDYING IN RELATED FIELD

“Studying in related field” refers to graduates who feel that their studies are connected to the diploma obtained.

REFERENCE WEEKS

The data are grouped according to reference weeks, being those of January 18 to 24, 2009, January 21 to 27, 2007 and January 16 to 22, 2005.

HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2009 *Reliance* survey of university graduates to illustrate the application of the definitions of the main terms used in the tables.

Calculation example: Results of the 2009 survey of graduates with a bachelor's degree

	Number	%	Calculation
Number of graduates targeted by the survey (size of the population)	30 204		
Total number of graduates who completed the questionnaire	19 566	100.0	
Employed	13 654	69.8	$13\,654 / 19\,566$
• full-time	12 095	88.6	$12\,095 / 13\,654$
- in related field	9 934	82.1	$9\,934 / 12\,095$
Seeking employment	646	3.3	$646 / 19\,566$
Studying	4 734	24.2	$4\,734 / 19\,566$
- in related field	4 035	85.2	$4\,035 / 4\,734$
Inactive	532	2.7	$532 / 19\,566$
Unemployment rate		4.5	$646 / (13\,654 + 646)$

OVERALL RESULTS

NOTES ON TABLES

1. Given the confidential nature of the data and a concern for maintaining the anonymity of the respondents, results for disciplines for which the number of graduates is less than five are not presented here. A list of these disciplines can be consulted in the survey report.
2. The results for which the response rate does not meet publication requirements are not presented. A list of these disciplines can be consulted in the survey report.
3. Because of the small number of graduates in certain disciplines, results in such cases should be interpreted with caution.
4. Results regarding the disciplines are presented according to the discipline codes established under the CLASS classification system.
5. The abbreviation “n.a.” indicates that the data are not available.
6. An “x” indicates that the data must remain confidential.
