INTRODUCTION

The data presented here are based on the results of the *Relance survey* of university graduates conducted every two years by the Ministère de l'Enseignement supérieur, de la Recherche, de la Science et de la Technologie (MESRST).

The purpose of this survey is to provide an accurate picture of the situation of graduates with a bachelor's or master's degree approximately 20 months after graduation. It meets a need for accurate, relevant information on how well recent university graduates are faring on the labour market.

For further information on the disciplines listed in this brochure or on other groupings of disciplines, please refer to the various documents related to the Relance survey that are available on the MESRST Web site at www.mesrst.gouv.qc.ca/Relance.

HIGHLIGHTS

The following highlights are primarily taken from the tables of overall results included in this brochure:

- During the week of January 20 to 26, 2013, approximately 20 months after graduation, 67.2% of graduates with a bachelor's degree and 78.3% of graduates with a master's degree were working full-time or part-time. In 2011 and 2009, the employment rates were, respectively, 68.2% and 69.8% for graduates with a bachelor's degree, and 78.1% and 78.7% for graduates with a master's degree.
- Depending on the field of study, the employment rate of graduates with a bachelor's degree ranged from 87.9% in education sciences to 38.4% in pure sciences. The particularly low employment rate among graduates with a bachelor's degree in pure sciences can be explained by the fact that a large proportion of them (54.9%) were students in January 2013. The employment rate for graduates with a master's degree varied from 90.0% in administrative sciences to 55.1% in literature.
- During the week of January 20 to 26, 2013, 26.3% of graduates with a bachelor's degree and 14.9% of graduates with a master's degree stated they were studying full-time or part-time and not working.
- The unemployment rate for graduates holding a bachelor's degree was 4.8% and the unemployment rate for graduates holding a master's degree was 4.7%. In general, unemployment rates for graduates holding a bachelor's or master's degree were markedly lower than the unemployment rate for the Québec labour force as a whole in January 2013 (7.1%).
- Among the employed graduates, 87.6% of those with a bachelor's degree and 91.8% of those with a master's degree were working full-time (30 or more hours a week). Approximately four out of five of the employed graduates were working in a job related to their field of study.
- Approximately 20 months after graduation, graduates with a bachelor's degree who were working full-time received an average gross weekly salary of \$925 while those with a master's degree earned \$1 202. In 2013, however, the average gross weekly salary of the women remained below that of the men: women with a bachelor's degree earned \$880 versus \$995 for men, and women with a master's degree earned \$1 149 versus \$1 272 for men.

GLOSSARY OF THE MAIN TERMS USED IN THE TABLES

TARGET GRADUATES

“Target graduates” refers to all holders of a bachelor’s or master’s degree who received their degree during the calendar year two years preceding the year of the survey.

RESPONSE RATE

“Response rate” refers to the percentage ratio between the number of target graduates who answered the questionnaire and the total number of target graduates.

EMPLOYED

“Employed” refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

SEEKING EMPLOYMENT

“Seeking employment” refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

STUDYING

“Studying” refers to target graduates who stated they were either studying full-time or part-time, and not working.

INACTIVE

“Inactive” refers to target graduates who stated they were not employed, were not seeking employment, and were not studying.

UNEMPLOYMENT RATE (UNEMPLOYED)

“Unemployment rate (unemployed)” refers to the percentage ratio between the number of graduates seeking employment and the number of people in the labour force as a whole (which consists solely of people who are employed and people who are seeking employment).

WORKING FULL-TIME

“Working full-time” refers to graduates working full-time, i.e. generally 30 hours or more per week.

WORKING PART-TIME

“Working part-time” refers to graduates working part-time, i.e. generally less than 30 hours per week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100%.

AVERAGE GROSS WEEKLY SALARY

“Average gross weekly salary” represents the average gross income earned by workers for one week of full-time work. The data reflect only graduates working for an employer.

WORKING IN A RELATED FIELD

“Working in related field” refers to graduates working full-time who consider their job to be connected to their field of study.

STUDYING IN A RELATED FIELD

“Studying in a related field” refers to graduates who are studying and who feel that their studies are connected to the degree they earned.

REFERENCE WEEKS

The data are grouped according to the following reference weeks: January 20 to 26, 2013; January 16 to 22, 2011; and January 18 to 24, 2009.

HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2013 *Relance survey* of university graduates to illustrate the application of the definitions of the main terms used in the tables.

Calculation example: Results of the 2013 survey of graduates with a bachelor's degree

	NUMBER	%	CALCULATION
Number of target graduates (size of the population targeted by the survey)	30 949		
Total number of graduates who completed the questionnaire	18 829	100.0	
Employed	12 651	67.2	$12\ 651 / 18\ 829$
• Full-time	11 080	87.6	$11\ 080 / 12\ 651$
> in a related field	8 851	79.9	$8\ 851 / 11\ 080$
Seeking employment	632	3.4	$632 / 18\ 829$
Studying	4 961	26.3	$4\ 961 / 18\ 829$
> in a related field	4 162	83.9	$4\ 162 / 4\ 961$
Inactive	585	3.1	$585 / 18\ 829$
Unemployment rate		4.8	$632 / (12\ 651 + 632)$

OVERALL RESULTS

NOTES ON TABLES

- 1 Given the confidential nature of the data and a concern for maintaining the anonymity of respondents, results for disciplines for which the number of graduates is less than five are not presented here.
- 2 The results for which the response rate does not meet publication requirements are not presented.
- 3 Because of the small number of graduates in certain disciplines, results in such cases should be interpreted with caution.
- 4 Results regarding the disciplines are presented according to the discipline codes established by MESRST.
- 5 The abbreviation “n.a.” indicates that the data are not available.
- 6 An “x” indicates that the data must remain confidential.
