INTRODUCTION

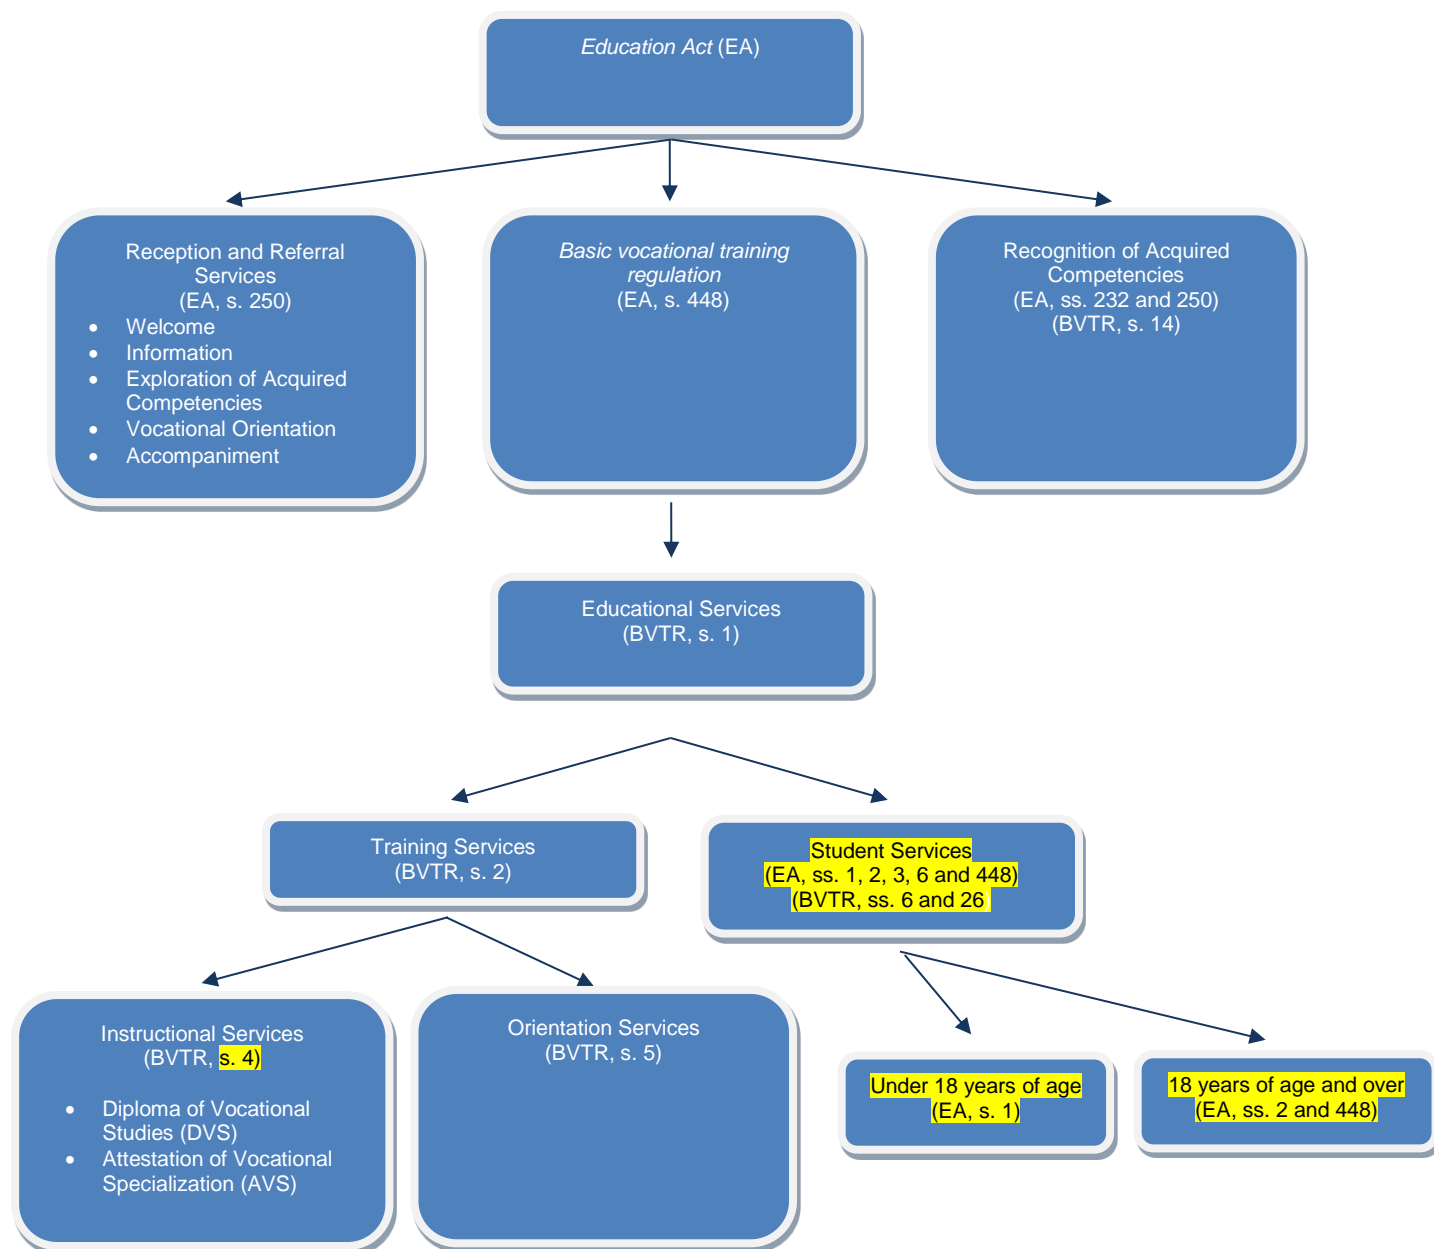

This document presents a portrait of all the services and programs of study provided under the umbrella of vocational training in Québec. More specifically, its nine sections provide information that complements the *Basic vocational training regulation* (BVTR). They cover certain relevant legal and regulatory frameworks; reception and referral services; the recognition of acquired competencies; educational services; instructional services; orientation services; student services; admission; and evaluation of learning and certification of studies. The document also includes seven schedules with supplementary information.

This tool is available to the staff of school boards and vocational training centres. In addition, private educational institutions holding permits, and colleges authorized to offer vocational training programs leading to a Diploma of Vocational Studies (DVS) or an Attestation of Vocational Specialization (AVS), are invited to use it as a reference.

1 REFERENCES TO CERTAIN VOCATIONAL TRAINING LEGAL AND REGULATORY FRAMEWORKS

Vocational training services are governed by the *Basic vocational training regulation* (BVTR) that devolves from section 448 of the *Education Act* (EA). They are also linked to reception and referral services as well as to the recognition of acquired competencies, both of which are provided for under the EA. Under section 467 of the EA, Québec school boards so designated by the Minister receive subsidies for vocational training services. Please note that this document does not constitute a legal interpretation of the cited sections of the *Education Act* and the *Basic vocational training regulation*.

LINKS BETWEEN THE *EDUCATION ACT* AND THE *BASIC VOCATIONAL TRAINING REGULATION*

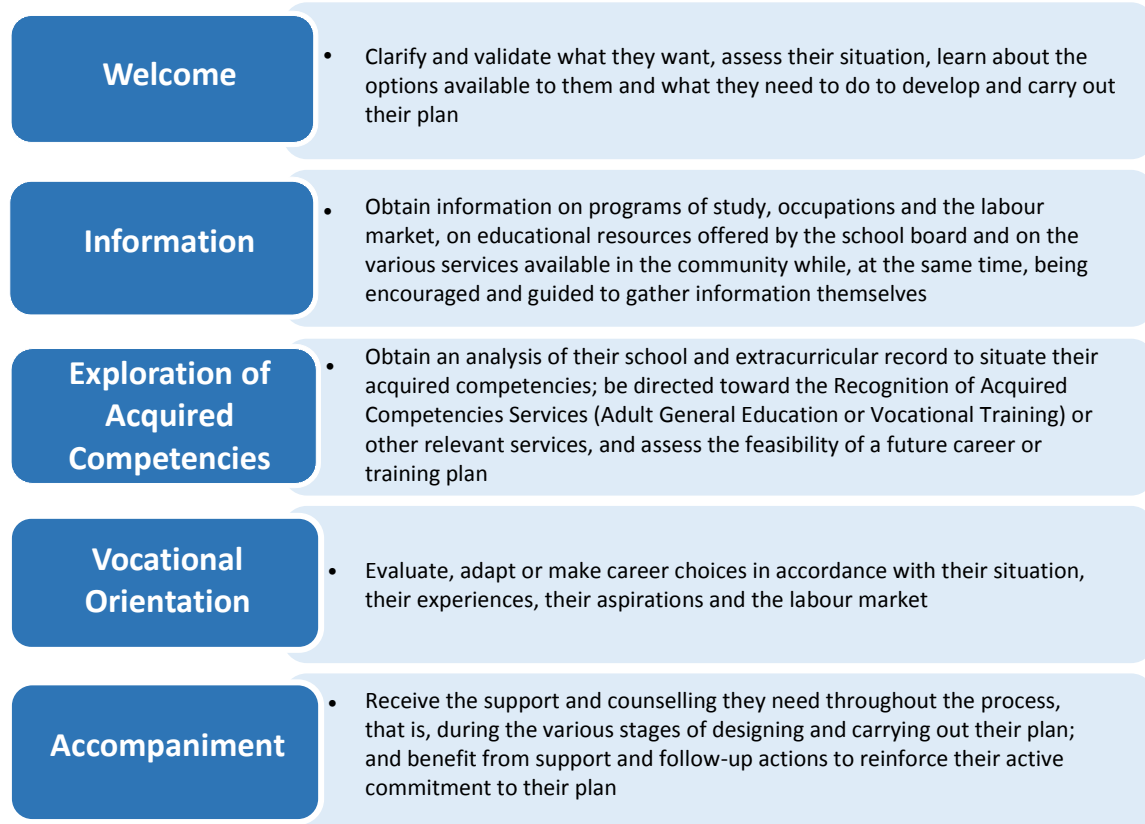

2 RECEPTION AND REFERRAL SERVICES

Reference No.: EA, s. 250

In accordance with the *Government Policy on Adult Education and Continuing Education and Training* (2002), the reception and referral services were enhanced by the addition of counselling and support services. All of these services are now referred to as SARCA (services d'accueil, de référence, de conseil et d'accompagnement [reception, referral, counselling and support services]).

SARCA services are designed to assist adults, whether enrolled in training or not, in choosing and implementing a learning plan in line with their personal and career goals.

To be more specific, SARCA is an integrated set of services that enable adults to do the following:

School boards are responsible for being proactive and working in partnership in order to reach the public targeted by the Policy. The funding is provided under the basic allocation included in the 2016-2017 budgetary rules.

3 RECOGNITION OF ACQUIRED COMPETENCIES

Reference No.: EA, ss. 232 and 250

The recognition of acquired competencies (RAC) in vocational training allows individuals to obtain official recognition for learning acquired outside the classroom, i.e. through employment experience or general life experience (volunteer activities, recreation, etc.). To be recognized, this prior learning must be evaluated on the basis of the competencies set forth in the ministerial programs of study (DVS or AVS), in accordance with the conditions and criteria set by the Minister. Students must fulfill the requirements for admission to the program of study in order to acquire the missing training declared by an educational institution.

The general and technical framework document *Recognition of Prior Learning and Competencies in Vocational and Technical Training*, and the job analysis report *Prior Learning Assessment and Recognition Advisor*, provide pertinent information on the approach adopted and the tasks to be performed. These documents are available on the Inforoute website at: <http://inforoutefpt.org/ministere/dossiers.aspx?langue=en>.

4 EDUCATIONAL SERVICES

Reference No.: BVTR, s. 1

Vocational training's educational services are composed of training services and student services.

4.1 Free educational services and conditions

Reference No.: EA, ss. 1 and 3; BVTR, ss. 26 and 27; budgetary rules for the 2016-2017 school year

Sections 1 and 3 of the EA and Sections 26 and 27 of the *Basic Vocational Training Regulation* specify the conditions for entitlement to free educational services in vocational training.

The training received by the student for a given period, such as from the beginning of September to the end of December, must correspond to an average of at least 15 hours a week, except in cases where the student is completing a program.

In accordance with the 2016-2017 budgetary rules, the student population eligible for grants includes persons who were granted recognition for prior learning and who continue the remainder of their training, even if they are enrolled for less than 15 hours a week when the remainder of their training requires it.

5 INSTRUCTIONAL SERVICES

5.1 Programs of study leading to a Diploma of Vocational Studies and an Attestation of Vocational Specialization

Reference No.: EA, ss. 461 and 463; BVTR, ss. 22 and 23

The vocational training programs and the types of certification provided for in the *Basic vocational training regulation* are listed in Schedules I and II to this administrative document.

Schedule I lists the programs of study leading to a DVS or an AVS, their admission requirements and the specific prerequisites applicable for the 2016-2017 school year.

Schedule II contains the list of training programs that have been withdrawn. The option to enrol in one of these programs is open only to students who successfully completed one or more courses in a program of study (DVS or AVS) listed in this schedule before June 30 of the school year in which the Minister withdrew the program.

School boards must ensure that students who wish to pursue a Schedule II program of study begun before July 1, 2016, and who have passed at least one of the courses in this program, continue to have access to the other courses in the program until the date on which it is scheduled to end

School boards must, therefore, either:

- (1) continue to offer the program itself
- (2) allow the students to continue their training in a new program of study (where applicable) by determining the appropriate equivalencies
- (3) refer the students to another school board or another educational institution that offers the program of study in question

5.2 Distribution of programs of study

Reference No.: EA, ss. 467 and 472

The document entitled *Carte des enseignements – Les programmes de formation professionnelle et technique* lists the vocational training programs leading to a DVS or an AVS that a school board is authorized to offer on a permanent or provisional basis during the 2016-2017 school year. Regularly updated information about the authorization of programs of study is available on the *Inforoute* website at: http://inforoutefpt.org/ministere_docs/adminInfo/carte_FPT.pdf (in French).

5.3 Vocational training programs subject to a limited enrolment set by MEES

Reference No.: Budgetary rules for the 2016-2017 school year

Information about certain vocational training programs subject to a limited enrolment set by MEES is presented in Schedule M of the budgetary rules for the 2016-2017 school year. This schedule lists the vocational specializations for which the Minister sets a maximum number of students in full-time equivalents (FTE) per school board for purposes of subsidies.

5.4 Permanent authorizations, provisional authorizations, agreements between educational institutions and delocalizations

Reference No.: EA, ss. 209, 213, 467 and 472; Budgetary rules for the 2016-2017 school year; *Cadre de gestion de l'offre de formation professionnelle et de l'offre de formation collégiale technique*

A school board that wishes to obtain a permanent or provisional authorization to offer a vocational training program leading to a DVS or an AVS must submit a request in accordance with the orientations set out in the *Cadre de gestion de l'offre de formation professionnelle et de l'offre de formation collégiale technique*. The same applies to requests for agreements between school boards or for delocalizations in order to offer a vocational specialization. These guidelines are contained in a document available (in French) on the *Inforoute* website at: http://inforoutefpt.org/ministere_docs/adminInfo/cadregestionFPT.pdf.

6 SERVICES SUPPORTING THE LEARNING PROCESS

Reference No.: BVTR, s. 5

These services are an extension of SARCA services. They pertain to the student's education plan, while student services pertain to the surrounding conditions that influence the student's learning.

7 STUDENT SERVICES

Reference No.: EA, ss. 1, 2, 3, 6, 110.11, 207.1, 247, 459; BVTR, ss. 6 and 26

Students under 18 years of age (or under 21 if they are handicapped) are entitled to student services under the *Basic school regulation for preschool, elementary and secondary education*, except for spiritual care and guidance and community involvement services. Guidance services are not part of student services in vocational training because they are provided as SARCA services.

For students 18 years of age or older (or 21 or older if they are handicapped), student services are provided as set out in the *Basic adult general education regulation*, except that, in vocational training, these services are provided free of charge if the person is enrolled on a full-time basis (i.e. 15 hours or more per week) throughout his or her training, unless the missing courses needed to complete his or her training require fewer than that minimum number of hours.

Student services for students 18 years of age or older (or 21 or older if they are handicapped) are designed to help adult learners successfully complete **their personal and vocational training plan**.

Student services consist of three programs: learning support services, counselling, promotion and prevention services, and student life services.

Learning Support Services

These services provide learning conditions that foster the perseverance and academic and career success of adult learners.

Counselling, Promotion and Prevention Services

These services promote **and encourage** the development and maintenance of attitudes and behaviours that have positive effects on adult learners' overall health and well-being.

Student Life Services

These services provide a stimulating environment that encourages adult learners to become committed to their academic and career plan, their learning environment and their community.

The budgetary rules for the 2016-2017 school year provide for special funding to improve access to student services for all students. These sums:

- come out of the “Personnel de soutien” component of the funding for educational activities in the vocational training sector under the school boards’ budgetary rules
- come out of the “Allocation de base pour les activités éducatives de la formation générale des jeunes” for students under 18 years of age (under 21 years of age if they are handicapped)
- come out of the “Allocation de base pour les activités éducatives des adultes de la formation générale,” (Section 2.1.1 Enveloppe budgétaire fermée, subsections a and d). Additional funding for adults with specific needs (subsection d) is allotted for adults enrolled in Adult General Education or Vocational Training, and is distributed based on the rules established in each school board. It therefore targets students 18 years of age and older (21 years of age and older if they are handicapped).

In addition, certain students with a major functional disability may benefit from the Allowance for Special Needs Program—Adults (secondary, college and university), through Aide financière aux études.

In the vocational training sector, the director of a training centre must develop individualized education plans adapted to the needs and abilities of students with handicaps, social maladjustments or learning disabilities, and must do so with the assistance of their parents, the student services staff and the students themselves, unless they are incapable of participating in this process.

The director shall see to the implementation and periodic evaluation of the education plan and inform the student’s parents on a regular basis.

8 ADMISSION

Reference No.: EA, s. 465; BVTR, ss. 12 and 13

The admission requirements are established by the Minister under section 465 of the EA. The specific prerequisites for each program of study are presented in Schedule I to this administrative document. This information can also be obtained at <http://www.inforoutefpt.org/default.aspx?langue=en>. Under “Training Programs,” click on “Find a program” and then on “Secondary,” under “Level.”

The school boards determine, in accordance with the conditions established by the BVTR, whether an individual requesting admission to a vocational training program satisfies the admission requirements for that program. The school boards include in the student’s file the documents supporting the admission to vocational training and to general education, in the case of a concurrent admission.

Certain programs have additional admission requirements. For example, the Trucking program (5791) requires that students meet the requirements set by the Société de l’assurance automobile du Québec (SAAQ) so they can obtain a Class 1 driver’s licence. In such cases, the program of study is the definitive reference.

In accordance with the conditions and criteria established by the Minister, the school boards may grant recognition for equivalent learning for general education courses certified by another competent authority, thereby allowing the student to satisfy the admission requirements (see the *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations: General Education, Youth Sector; General Education, Adult Sector; Vocational Training*, Direction de la sanction des études, Ministère de l’Éducation et de l’Enseignement supérieure [MEES]).

School boards are also responsible for ensuring that students admitted to a vocational training program have sufficient mastery and understanding of the language of instruction to successfully complete their training (see the *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations: General Education, Youth Sector; General Education, Adult Sector; Vocational Training*, Direction de la sanction des études, MEES, sections 4.1, 4.3.9, 6.7.2 and 7.5).

8.1 Admission to a program of study leading to a DVS

Reference No.: BVTR, ss. 12 and 22

Students must satisfy the admission requirements for the program concerned in order to obtain a DVS.

Students who earn all the credits in a vocational training program through the recognition of acquired competencies are not required to meet the admission requirements in order to be awarded a diploma. However, students must fulfill the admission requirements for the remainder of the training, as declared by the educational institution.

An individual who has reached 18 years of age may be admitted to a program of study leading to a DVS on the basis of the following functional prerequisites: successful completion of the General Development Test (GDT) and the obtaining of credits or the successful completion of examinations related to the specific prerequisites in language of instruction and mathematics, if any, for the program concerned. The GDT may be retaken only once, one year later.

An adult who has obtained a Training Certificate in a Semiskilled Trade (TCST) by successfully completing the GDT to demonstrate learning in general education must successfully complete the specific prerequisites for admission to certain vocational training programs (*Info/Sanction*, number 08-09-027).

By continuing to take general education courses concurrently with their vocational training, students admitted to a program of study under paragraph 4 of section 12 of the *Basic vocational training regulation* may avail themselves of paragraphs 1, 2 or 3 of that same section while receiving training, if they meet the stipulated admission requirements.

8.2 Concurrent admission to a vocational training program leading to a DVS or an AVS and to general education

Reference No.: BVTR, s. 12, para. 4; ss. 16, 19 and 25

Under the *Basic vocational training regulation*, concurrent admission to a vocational training program and to general education is one of the conditions for admission to vocational training.

Students are admitted concurrently for one of the following three reasons:

- to complete the general education prerequisites required to obtain a diploma in a vocational training program in which they are enrolled
- to obtain the credits they are missing to earn an SSD
- to complete the general education prerequisites required for admission to college studies

Concurrent admission is designed for students in the youth or adult sector who have earned Secondary III credits in the three core subjects, namely, language of instruction, second language and mathematics, and who possess vocational maturity. They will pursue their vocational training at the same time as their general education in Secondary IV or V in these subjects or, where they have already completed the prerequisites required to obtain a vocational training diploma, in the missing subjects needed for an SSD or for admission to college.

This training path is also intended for those who are at least 18 years of age and who have successfully completed the General Development Test (GDT). These persons can continue their training concurrently to acquire the specific prerequisites needed to obtain a vocational training diploma.

Concurrent admission applies in two different ways:

- **Integrated schedule:** The vocational training and general education courses are integrated to give the student a normal schedule. The school board organizes this schedule to ensure that general education accounts for a minimum of 20% (up to a maximum of 60%) of the curriculum in a given school year.
- **Non-integrated schedule:** The hours devoted to general education courses are added to those for vocational training. In this case, students organize their course schedules in general education and vocational training.

Additional funding is provided under the budgetary rules to offer special support and guidance for students under 20 years of age, and for students 20 years of age or older who are continuing in a program started during the previous school year. Additional funding is also provided for organizing concurrent admission with an integrated schedule and adapting general education courses to the vocational training received by the student.

8.2.1 Pilot projects for concurrent admission with an integrated schedule to Secondary III in general education and to a vocational training program leading to a DVS

Reference No.: BVTR, s. 12, para. 4; ss. 16, 19 and 25

To promote student retention and academic success for the greatest possible number of students at a crucial point in their schooling, concurrent admission with an integrated schedule to vocational training and general education in the youth sector in Secondary III is henceforth permitted upon approval by the Ministère.

The pilot projects for concurrent admission with an integrated schedule to a vocational training program leading to a DVS and to general education courses are intended for students who were 15 years of age on June 30 of the year preceding the pilot project, and who have already confirmed their vocational orientation and completed their Secondary II language of instruction, second language and mathematics courses. The programs of study eligible for these projects are listed in Schedule VII.

The funding for these pilot projects is the same as for the other forms of concurrent admission with an integrated schedule.

8.3 Provisional bridge between a TCST and a program of study leading to a DVS

Reference No.: EA, s. 465; BVTR, s. 12, para. 2

Under section 465 of the EA, the Minister has approved, for 2016-2017, the establishment of a provisional bridge that allows holders of a TCST to be admitted to certain programs of study leading to a DVS. To be admitted under this provisional bridge to one of these programs, the list of which is contained in Schedule VI, a person must satisfy all of the following conditions:

- be at least 16 years of age on September 30 of the school year during which he or she begins his or her vocational training
- hold a TCST
- have obtained the required credits in language of instruction, second language and mathematics in Secondary Cycle One in general education in the youth sector or in Secondary II in adult general education

Additional funding is provided for in the budgetary rules to offer special support or supplementary learning activities for the students targeted, or to reinforce support for the vocational training teachers concerned.

Schedule VI contains a table of the credits required and a list of the DVS programs for which a provisional bridge is available.

Information on the credits recognized for the purposes of admission to DVS programs for which a provisional bridge is available, is provided in the official programs of general education in the youth sector and of adult general education, as set out in the pedagogical framework of the Charlemagne system.

8.4 Programs of study leading to an AVS

Reference No.: BVTR, s. 13 and 23

DVS programs that serve as prerequisites for admission to programs of study leading to an AVS are listed in Schedule I. They are also available at www.inforoutefpt.org. Click on "English" at the top of the page and then, under the heading "Training programs," click on "Find a program." Select "Secondary" from the list on the right side of the page, click in the AVS box and then on the "Submit" tab.

The school board must ensure that the individual has acquired the learning recognized as equivalent to the DVS prerequisite, or that he or she practises a trade or occupation related to the particular program of study, in order to comply with the conditions for admission to a program of study leading to an AVS.

Learning recognized as equivalent may be scholastic or experiential. Students will be awarded a DVS for experiential learning only if they have satisfied the specified conditions.

9 EVALUATION OF LEARNING AND CERTIFICATION OF STUDIES

9.1 Evaluation of learning

Reference No.: EA, ss. 110.12, 249 and 250; BVTR, ss. 17, 18, 20 and 24

The list of competencies by vocational training program, for which the Minister sets examinations, appears in Schedule IV. The vocational training centre must administer these examinations, and the school board must ensure that the vocational training centres evaluate the students' learning and use the required examinations.

Evaluation as a support to learning (or formative evaluation) shall in no way count toward the granting of credits.

The procedures for administering the ministerial examinations are set by MEES. In addition, the application of these procedures is described in the *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations: General Education, Youth Sector; General Education, Adult Sector; Vocational Training*.

As stated in this guide, "For certain vocational programs of study, **MEES** develops evaluation materials for the recognition of acquired competencies (RAC). These carry the same value as the ministerial examinations and must be used by educational institutions." Schedule V lists the RAC tools developed by the Ministère.

In the case of programs of study for which the Ministère has not developed RAC tools, evaluation is the responsibility of the educational institution unless ministerial examinations have been set for competencies in these programs.

9.2 Certification of studies

Reference No.: BVTR, ss. 22, 23 and 25

Credits may be granted as a result of the evaluation of learning or of an evaluation carried out as part of the process for the recognition of acquired competencies.

For a DVS or an AVS to be awarded on the basis of equivalences, a person must be evaluated for at least one of the competencies of the program concerned (see the *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations: General Education, Youth Sector; General Education, Adult Sector; Vocational Training*).

Schedule III lists the courses outside of the ministerial programs of study for which the Minister issues an achievement record.

Schedule I

Vocational training programs leading to a DVS or an AVS, their admission requirements and their specific prerequisites, 2016-2017

INTRODUCTION

This schedule contains the list of authorized vocational training programs leading to a Diploma of Vocational Studies (DVS) or an Attestation of Vocational Specialization (AVS), by training sector, for the 2016-2017 school year. The list is divided into three sections: programs of study, admission requirements and specific prerequisites.

■ Programs of study

This section of the schedule contains the following information, by sector, for each program of study: number and title of program, means of evaluation, duration (in hours) and evaluation category.

The means of evaluation indicates how the results are to be transmitted to MEES.

The evaluation category is determined by the amount and complexity of resources that are required to evaluate the program. This factor is taken into account when determining the allocation to be given to the school board to offer this program of study (see the complementary document to the budgetary rules for the 2016-2017 school year).

■ Admission requirements

This section of the schedule begins with the categories of prerequisites for each program of study. These categories are defined on the following pages.

The table then specifies, as applicable, the level (Secondary III, IV or V) of the credits required in language of instruction, second language and mathematics, in accordance with section 465 of the *Education Act* (EA), or for persons of at least 16 years of age, as defined in section 12, paragraph 2, of the *Basic vocational training regulation* (BVTR) for programs leading to a DVS. The DVS prerequisites for various AVS programs appear in the next column.

Under section 14 of the BVTR, admission to a program of study leading to a DVS or an AVS can be granted to persons whose prior learning or acquired competencies are duly recognized as equivalent.

Prerequisite categories 1, 2, 4, 5 and 6 list the admission requirements for programs leading to a DVS, as set out in section 12 of the BVTR and, if applicable, those that the Minister has added in accordance with this Regulation and section 465 of EA for each of the requirements. As stipulated in section 12 of the BVTR, a person may be admitted if he or she meets any of the requirements outlined in paragraphs 1 to 4 of that section.

Prerequisite category 3 corresponds to the admission requirements for programs leading to an AVS, as prescribed by section 13 of the BVTR. Given that neither the prerequisites in language of instruction, second language and mathematics, nor the specific prerequisites, apply to these programs, the corresponding columns have been left blank.

Category 1

Persons holding a Secondary School Diploma or its recognized equivalent, for example, an Attestation of Equivalence of Secondary V studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary IV credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test and the specific prerequisites listed in this schedule for the desired program, or recognition of equivalent learning

OR

Persons who have obtained Secondary III credits in language of instruction, second language and mathematics in programs established by the Minister are required to pursue general education courses, concurrently with their vocational training, in order to obtain the Secondary IV credits they lack in language of instruction, second language and mathematics in programs established by the Minister

Category 2

Persons holding a Secondary School Diploma or its recognized equivalent, for example, an Attestation of Equivalence of Secondary V studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test and the specific prerequisites listed in this schedule for the desired program, or recognition for equivalent learning

Two specific conditions apply to programs in this category:

Persons who are at least 16 years of age on September 30 of the school year in which their vocational training is to begin in a specific program of study (Schedule VI), who hold a Training Certificate in a Semiskilled Trade, and who earned the required credits in language of instruction, second language and mathematics in Secondary Cycle One in general education in the youth sector or in Secondary II in general education in the adult sector (provisional bridge for the 2016-2017 school year) (see Section 8.3).

Persons who are 15 years of age on June 30 of the school year preceding their admission to a pilot project involving concurrent general education and practical training, who have attained vocational maturity and who have earned their Secondary II credits in language of instruction, second language and mathematics. By means of concurrent admission with an integrated schedule, they will continue their vocational training and their general education in the youth sector to complete the Secondary III prerequisites they need to obtain their vocational training diploma. Authorization by the Ministère is required for the concurrent admission of a student in Secondary III to the programs of study listed in Schedule VII (see Section 8.2.1).

Category 3 (for an AVS)

Persons holding a DVS in the occupation corresponding to the program of study selected or having been granted recognition for equivalent learning

OR

Persons practising an occupation related to the program of study

Category 4

Persons holding a Secondary School Diploma or its recognized equivalent, for example, an Attestation of Equivalence of Secondary V studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary V credits in language of instruction and Secondary IV credits in second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test, as well as Secondary V credits in language of instruction in a program of study established by the Minister, or recognition for equivalent learning

OR

Persons having earned Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister and who will continue their general education courses concurrently with their vocational training in order to obtain the credits they are missing from among the following: Secondary IV and V language of instruction and Secondary IV second language and mathematics in the programs of study established by the Minister

Category 5

Persons holding a Secondary School Diploma or its recognized equivalent, for example, an Attestation of Equivalence of Secondary V studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree, and having a good knowledge of Inuktitut

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin, have a good knowledge of Inuktitut and have earned the Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program, have a good knowledge of Inuktitut and have successfully completed the General Development Test (GDT), or have been granted recognition for equivalent learning

Note: For programs of study in this category, persons may continue their general education courses concurrently with their vocational training provided that they have a good knowledge of Inuktitut and have earned at least the Secondary III credits in language of instruction, second language and mathematics in the programs established by the Minister or they are at least 18 years of age and have successfully completed the General Development Test (GDT).

Category 6

Persons holding a Secondary School Diploma or its recognized equivalent, for example, an Attestation of Equivalence of Secondary V studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree, or having earned Secondary V credits in language of instruction and second language in the programs of study established by the Minister, or having been granted recognition for equivalent learning

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned Secondary V credits in language of instruction and second language and Secondary IV credits in mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test, as well as Secondary V credits in language of instruction and second language in the programs of study established by the Minister, or recognition of equivalent learning

OR

Persons having earned Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister and who will continue their general education concurrently with their vocational training in order to obtain the credits they are missing in Secondary V language of instruction and second language and in Secondary IV mathematics in the programs of study established by the Minister

▪ Specific prerequisites

Schedule I lists the course codes for the current programs in adult general education and in general education in the youth sector that are required as specific prerequisites in language of instruction and mathematics. Given that the new course codes for Common Core Basic Education (CCBE) and Diversified Basic Education (DBE) are being implemented progressively, the old codes for the programs of study concerned are shown between parentheses. The specific prerequisites and successful completion of the General Development Test (GDT) are functional prerequisites (BVTR, s. 12, para. 3). When a DVS does not require any specific prerequisites in language of instruction or mathematics, a dash (–) appears in the corresponding cells. For the programs *Vente de voyages* (5236), *Travel Sales* (5736), *Santé, assistance et soins infirmiers* (5325) and *Health, Assistance and Nursing Care* (5825), there are reference notes in the appropriate boxes.

A person is recognized as having the specific prerequisites for a vocational training program when he or she:

- has already completed, in the adult general education sector or the youth sector, the courses designated as specific prerequisites for that program of study

OR

- has passed the examinations leading to certification of these courses (the “examination only” measure can apply to the evaluation of specific prerequisites)

OR

- has been granted recognition for equivalent learning for the courses designated as specific prerequisites

- **Specific prerequisites in language of instruction**

For each DVS in French, the new course codes (prefix FRA) for Common Core Basic Education (CCBE) and for Diversified Basic Education (DBE) in *Français, langue d'enseignement* are provided. It should be noted that in cases where the new course codes for CCBE and DBE are undergoing progressive implementation, the old course codes are still valid and have been provided in parentheses. A correspondence table for specific prerequisites appears on the following page. The program codes in general education in the youth sector (prefix 132) are also provided.

For DVSs in English, the new course codes for CCBE and DBE are also provided. As mentioned above, since the new course codes for CCBE and DBE are in progressive implementation, the old course codes are still valid and are shown between parentheses. The program codes in general education in the youth sector (prefix 632) are also provided.

- **Specific prerequisites in mathematics**

For each DVS, all the new course codes (prefix MAT or MTH) for the mathematics program in CCBE and DBE are provided. As with the specific prerequisites in language of instruction, the old course codes are still valid and are shown between parentheses. The program code in general education in the youth sector (prefixes 063 and 563) is also provided.

Schedule II

Withdrawn vocational training programs, 2016-2017

INTRODUCTION

This schedule lists the vocational training programs for which school boards and educational institutions are no longer authorized to accept new enrolments.

These programs are reserved for those students who began a program of study leading to a DVS or an AVS before **July 1, 2016**, and who meet the following requirement:

- They have successfully completed one or more courses in a program of study listed in this schedule before June 30 of the school year in which the Minister withdrew the program.

Each program in this schedule is identified by the year it was withdrawn and the year in which it will end. Students already enrolled in one of these programs of study should have finished their studies before July 1 of the year in which it will end in order to be awarded the desired DVS or AVS. Students therefore have four years from the time the program was withdrawn to complete their training.
