COMPULSORY SECTION

Prepared by:

Date (year-month-day):

Important information – Mid-term and completion report on the child’s learning progress (Secondary Cycle Two)

Mid-term report

The parents must send the Minister a mid-term report on the child’s learning progress between the third and fifth month after the beginning of implementation of the learning project.

When a child stops attending an educational institution after December 31, the submission of the mid-term report is optional.

The parents may send the mid-term report and the status report at the same time in a single document or separately at different times, provided that they meet the respective deadlines.

Completion report

The parents must send the completion report no later than June 15 after the beginning of implementation of the learning project.

When a child stops attending an educational institution between January 1 and March 31, the status report must also be submitted no later than June 15 following the beginning of implementation of the learning project. Parents may send the status report and the completion report at the same time in a single document or separately at different times, provided that they meet the respective deadlines.

Parents who require assistance in preparing the report on their child’s learning progress may contact the Direction de l’enseignement à la maison.

In accordance with the *Homeschooling Regulation* (CQLR, c. I-13.3, r. 6.01), the Direction de l’enseignement à la maison has produced a document explaining the requirements with regard to the subjects and competencies that must be taught, monitored and evaluated every year or cycle, depending on the subject or level of education. Parents will receive this document from the resource person assigned to their family.

- 1. Report on the child’s learning progress:** The mid-term and completion reports are documents in which parents provide information on their child’s learning progress and the evaluations conducted to assess it.
- 2. School service centre or school board with jurisdiction:** According to the *Education Act* (CQLR, c. I-13.3), this is the school service centre or school board that has jurisdiction over the territory in which the child resides. The child must be declared eligible for instruction in English before they can be assigned an English school board.
- 3. Level of instruction:** The level of instruction corresponds to the school year in the cycle of education in which the child would be enrolled if they were attending a school.
- 4. Subjects:** The Québec Education Program establishes the compulsory and optional programs of study for all children and students in Québec.

The official programs of study in each subject must be taught to allow progress in learning equivalent to the progress expected in each cycle at school. The learning project must target the development of competencies in English (language of instruction, if the learning project incorporates English Language Arts), French (language of instruction and second language) and Mathematics each year. For the subjects in Science and Social Sciences, parents have a certain degree of flexibility as to when prescribed content is taught within a cycle, except in Secondary Cycle Two, where these subjects must be taught each year.

If parents believe that their child should be exempt from one or more subjects due to a disability, social maladjustment or learning difficulty, they may submit a request to their resource person. In the case of a child with a moderate to severe or a profound intellectual disability, parents may develop a learning plan based on the appropriate educational program ([CASP-I](#), [Challenges](#) or [EPPII](#)). No exemption may be granted in language of instruction, second language or mathematics.

5. Level(s) of instruction: Parents must indicate the level or levels of instruction for each subject targeted in the learning project. It is possible that the level or levels targeted by different subjects are not the same, that the child acquires learning usually covered during an entire cycle within a single year, or that content from a previous or subsequent year in the same cycle will be targeted.

6. Evaluations conducted: Parents must indicate the method(s) that were used to evaluate the child’s learning. Parents are responsible for taking the necessary steps involved in conducting such evaluations.

Important information – Mid-term and completion report on the child’s learning progress (Secondary Cycle Two) (cont.)

The following evaluation methods are available to parents:

- **Evaluation by the school service centre or school board:** Parents may choose to have their child evaluated by the school service centre or school board with jurisdiction, in accordance with the procedures established by that school service centre or school board.
- **Evaluation by the holder of a teaching licence:**¹ This is an evaluation by a person who holds a teaching licence issued by the Minister, as set out in the *Regulation respecting teaching licences* (CQLR, c. I-13.3, r. 2.01).
- **Evaluation by a private school:** Parents may choose to have their child evaluated by a private school governed by the *Act respecting private education* (CQLR, c. E-9.1), in accordance with the procedures determined by that school.
- **Examinations set by the Minister:**
 - Uniform examinations are administered in Secondary IV (Mathematics; Science and Technology or Applied Science and Technology; and History of Québec and Canada) and in Secondary V (Français, langue d’enseignement [French sector only] or English Language Arts; and English as a Second Language [core or enriched program, French sector only] or French as a Second Language [core or enriched program]).
- For more information, consult the following page: <http://www.education.gouv.qc.ca/en/parents-and-guardians/exams/schedule-for-the-examination-session-and-retake-of-examinations>
- **Portfolio submitted to the Minister:**² Parents who choose the portfolio as an evaluation method must ensure that the submitted document respects the requirements and conditions set out by the Direction de l’enseignement à la maison.

7. Comments on the child’s learning progress: In these sections, parents must provide comments on their child’s learning progress for each competency targeted in the learning project. The comments must demonstrate the learning-related changes that have occurred since the initial implementation of the learning project or since the mid-term report, as applicable. The comments may pertain to the child’s progress, difficulties or a lack of significant progress.

8. Personal Development: To obtain a Secondary School Diploma, students must complete 54 credits, including 2 credits in either Secondary V Ethics and Religious Culture or Secondary V Physical Education and Health.

9. Arts Education: To obtain a Secondary School Diploma, students must complete 54 credits, including 2 credits in Secondary IV Arts Education.

10. Optional subjects: In Secondary Cycle Two, the Québec Education Program includes a range of compulsory and optional subjects, combining the basic education all students need with more specialized training corresponding to their individual interests, aptitudes and talents. For this purpose, the Minister determines the list of elective subjects for which a program of study will be established, as well as the number of credits to be assigned for each of these subjects.

11. Other subjects, knowledge or competencies: Some elements of learning complete and enrich a child’s existing knowledge. Activities that foster such learning may include computer courses, lifeguard or babysitter training, learning a sign language or another language, wilderness orientation, crafts, horticulture, mechanics, farming or martial arts.

12. Documents included with the report on the child’s learning progress: The Direction de l’enseignement à la maison encourages parents to submit documents that may be useful when assessing the reports on their child’s progress.

If the parents have chosen to have their child evaluated by a school service centre or school board that has jurisdiction, a private school or the holder of a teaching licence, they must submit the findings of these evaluations to the Direction de l’enseignement à la maison.

If parents receive the evaluation results after the deadline for submission of a report on their child’s progress, they must immediately upon receiving these results forward the required information to the resource person assigned to their family.

If the parents have chosen to submit a portfolio to the Minister, they must submit it at the same time as the completion report.

¹ The Direction de l’enseignement à la maison has created a reference document intended for parent-educators that sets out the requirements and conditions of this evaluation method. This document is entitled *Evaluations Conducted in a Homeschooling Context by the Holder of a Teaching Licence*.

² The Direction de l’enseignement à la maison has created a reference document intended for parent-educators that sets out the requirements and conditions of this evaluation method. This document is entitled *The Portfolio in a Homeschooling Context*.

Important information – Mid-term and completion report on the child’s learning progress (Secondary Cycle Two) (cont.)

The Direction de l’enseignement à la maison recommends that parents keep evidence of learning on hand (including the date, learning context and educational aim). They are also encouraged to record and comment on any observations they have made, so that this information is available if needed. These comments and observations may also be useful when preparing the reports on the child’s learning progress or the portfolio, if parents have chosen this evaluation method.

The **learning context** refers to the context in which a learning activity or project is carried out (e.g. formal, informal or real-life situation, time required for the task, resources and tools used, degree of independence, interest and motivation in the task, type of support provided).

The **educational aim** refers to what a child is expected to know and be able to do when carrying out an activity or project.
