## INTRODUCTION

The data presented here are based on the results of the Relance survey of university graduates conducted every two years by the Ministère de l'Éducation et de l'Enseignement supérieur.

The purpose of the 2017 survey is to provide an accurate picture of the situation of 2015 graduates with a bachelor's or master's degree approximately 20 months after graduation. It meets a need for accurate and up-to-date information on how well recent university graduates are faring on the labour market. Results are also presented for the surveys conducted in 2015 and 2013 on the situation of 2013 and 2011 graduates, respectively.

For further information on the disciplines listed in this brochure or on other groupings of disciplines, please refer to the various documents related to the Relance survey that are available on the ministerial website at [www.education.gouv.qc.ca/references/indicateurs-et-statistiques/enseignement-superieur/enquetes-relance/](http://www.education.gouv.qc.ca/references/indicateurs-et-statistiques/enseignement-superieur/enquetes-relance/)

## HIGHLIGHTS

Some highlights from the 2017 survey (describing the situation as of January 2017):

- During the week of January 15 to 21, 2017, approximately 20 months after graduation, 67.2% of graduates with a bachelor's degree and 80.7% of graduates with a master's degree were working full-time or part-time. In 2013 and 2015, the employment rates were 67.2% and 65.5% respectively after a bachelor's degree and, 78.3% and 79.2% respectively, after a master's degree.
- The employment rate for graduates with a bachelor's degree ranged according to their field of study from 86.2% (education) to 39.6% (pure science). The particularly low employment rate among graduates with a bachelor's in pure science is explained by the fact that a large proportion of them (53.9%) were enrolled in studies in January 2017. The employment rate among graduates with a master's degree ranged from 89.6% (administration) to 58.3% (pure science).
- The proportion of graduates who, during the week of January 15 to 21, 2017, reported that they were studying full-time or part-time and did not have a job, was 26.5% among holders of a bachelor's degree and 12.7% among holders of a master's degree.
- The unemployment rate was 4.7% for graduates with a bachelor's degree and 3.7% for graduates with a master's degree. Nevertheless, it is generally easier for university graduates to enter the job market than for the Québec labour force as a whole, which posted an unemployment rate of 6.2% in January 2017.
- Among employed graduates working full-time (30 hours a week or more), 87.4% had a bachelor's degree and 90.1% had a master's degree. Slightly over three quarters (77.3%) of full-time jobs were related to the field of study of graduates with a bachelor's degree. At 81.4%, the rate was slightly higher for graduates with a master's degree.
- Approximately 20 months after graduation, holders of a bachelor's or a master's degree who were working full-time were earning a gross average weekly salary of \$978 and \$1 243 respectively.

## **GLOSSARY OF THE MAIN TERMS USED IN THE TABLES**

### **TARGET GRADUATES**

“Target graduates” refers to all holders of a bachelor’s or master’s degree targeted by the survey who received their degree during the calendar year two years preceding the year of the survey.

### **RESPONSE RATE**

“Response rate” refers to the number of target graduates who responded to the questionnaire as a percentage of the total number of target graduates surveyed.

### **AVERAGE AGE OF GRADUATES**

“Average age of graduates” refers to their average age on July 1, 2013.

### **EMPLOYED**

“Employed” refers to target graduates who stated they were self-employed or working for an employer, and not studying full-time.

### **SEEKING EMPLOYMENT**

“Seeking employment” refers to target graduates who stated they were actively looking for a job and were neither studying nor working.

### **STUDYING**

“Studying” refers to target graduates who stated they were either studying full-time or part-time, and not working.

### **INACTIVE**

“Inactive” refers to target graduates who stated they were not employed, were not seeking employment and were not studying.

## **UNEMPLOYMENT RATE**

“Unemployment rate (unemployed)” refers to the percentage ratio between the number of graduates seeking employment and the number of people in the labour force as a whole (which consists solely of people who are employed and people who are seeking employment).

## **WORKING FULL-TIME**

“Working full-time” refers to graduates working full-time, i.e. generally 30 hours a week or more.

## **SELF-EMPLOYED**

“Self-employed” refers to graduates who stated they were self-employed full-time and did not hold a full-time paid-employment position.

## **PERMANENT PAID EMPLOYMENT**

“Permanent paid employment” refers to a full-time paid-employment position held by a graduate for which there is no indication that it will end on a determined date. This proportion is calculated based only on graduates holding a full-time paid-employment position.

## **WORKING PART-TIME**

“Working part-time” refers to graduates who are generally working less than 30 hours a week. The proportion of graduates working part-time is obtained by subtracting the proportion of graduates working full-time from 100% of all working graduates.

## **PAID EMPLOYMENT - HOURS WORKED**

“Paid employment – hours worked” refers to the average number of hours worked by graduates employed full-time in a normal work week. The data reflect only graduates working for an employer.

## **AVERAGE GROSS WEEKLY SALARY**

“Average gross weekly salary” represents the average gross income earned in a normal week by graduates working full-time. The data reflect only graduates working for an employer.

## **WORKING IN RELATED FIELD**

“Working in related field” refers to graduates working full-time who consider their job to be relevant to their field of study.

## **STUDYING IN RELATED FIELD**

“Studying in a related field” refers to graduates who are studying and who feel that their current studies are in a field related to the degree they earned.

## **REFERENCE WEEKS**

The data are grouped according to the following reference weeks: January 15 to 21, 2017; January 18 to 24, 2015; and January 20 to 26, 2013.

## HOW INDICATORS ARE CALCULATED

The calculation table below uses data from the 2017 *Relance* survey of university graduates to illustrate the application of the definitions of the main terms used in the tables. Among the variables presented in this brochure, only the proportions of the four main situations (employed, seeking employment, studying, inactive) can be added together and total 100% of the respondents.

### Calculation example: Results of the 2017 survey of graduates with a bachelor's degree

	NUMBER	%	CALCULATION
Number of graduates targeted by the survey (size of the population)	33 757		
Total number of people who responded to the questionnaire	21 687	100.0	
Employed	14 568	67.2	$14\ 568 / 21\ 687$
• full-time (paid employment or self-employment)	12 726	87.4	$12\ 726 / 14\ 568$
> paid employment	12 053	-	
> permanent paid employment	9 512	78.9	$9\ 512 / 12\ 053$
> self-employment (without paid employment)	673	5.3	$673 / 12\ 726$
> working in related field	9 843	77.3	$9\ 843 / 12\ 726$
Seeking employment	713	3.3	$713 / 21\ 687$
Studying	5 756	26.5	$5\ 756 / 21\ 687$
> in a related field	4 722	82.0	$4\ 722 / 5\ 756$
Inactive	650	3.0	$650 / 21\ 687$
Unemployment rate		4.7	$713 / (14\ 568 + 713)$

## NOTES ON TABLES

- 1** Given the confidential nature of the data and a concern for maintaining the anonymity of subjects surveyed, results for disciplines for which the number of graduates is less than five are not presented here.
- 2** The results for which the response rate does not meet publication requirements are not presented.
- 3** Results for disciplines with a small number of graduates should be interpreted with caution.
- 4** Results regarding the disciplines are presented according to the discipline codes established by the Ministère.
- 5** The symbol “-” indicates that the data are not available.
- 6** An “x” indicates that the data must remain confidential.
