1. INTRODUCTION

This definition of the domain for summative evaluation describes and classifies the essential and representative elements of the Sociovocational Integration Services program and, more specifically, of the course entitled Realities in the World of Work (SVI-P003-1). It is based on the program’s organization guide, but should by no means replace the guide itself. It takes into account the diversity of local organizations and the implementation of local projects, while ensuring that all summative evaluation instruments are consistent with the overall program. It is an essential tool for developing summative evaluations that are in line with instructional planning.

The definition of the domain for summative evaluation is used to prepare examinations that are valid from one version to another, from year to year, and from one school board to another, taking into account the division of responsibilities shared by the Ministère de l’Éducation, du Loisir et du Sport and the school boards.
2. PROGRAM ORIENTATIONS AND CONSEQUENCES FOR SUMMATIVE EVALUATION

<tbody>
<tr>
<td>1. “Sociovocational integration involves every dimension of the students,”* including physical, intellectual, emotional, spiritual and social dimensions. Education must target the whole person, including personal, career and social experience and goals.</td>
<td>1. This definition of the domain for summative evaluation takes only cognitive skills into account; socioaffective skills are dealt with by means of formative evaluation.</td>
</tr>
<tr>
<td>2. “Sociovocational integration enables students to learn to learn,”* i.e. to know their own personal way of learning, realize their intellectual potential, facilitate their personal and social development and vocational integration, interact with their environment and broaden their vision of the world.</td>
<td>2. The evaluation should verify the students’ ability to use their critical judgment, generalize their learning, seek meaning in their experiences and learning, solve problems and integrate new information.</td>
</tr>
<tr>
<td>3. “Sociovocational integration permits students to become familiar with and to make use of the social, political and economic environment,”* i.e. to promote and use the natural network of relationships and the environment.</td>
<td>3. The evaluation should verify the students’ familiarity with their environment at the end of the course and their ability to use the available resources.</td>
</tr>
<tr>
<td>4. “Sociovocational integration is an ongoing, permanent process”* in a job market in which people are constantly evolving.</td>
<td>4. Taking into account the local situation, the evaluation should verify the level of correspondence between, on the one hand, the students’ ability to reproduce and transfer their learning without help and, on the other hand, their choice of vocational integration training suited to their preferences, their abilities and their continuing education and training needs.</td>

5. **EXPLANATION OF THE CONTENT AND WEIGHTING**

The expected outcome for course SVI-P003-1 involves themes and skills that can be weighted according to their complexity.

The themes and skills for summative evaluation have been selected from among those considered essential for achieving the expected outcome of the course: "**learn about realities in the world of work and know where they stand with respect to those realities.**" These themes and skills have been selected and weighted in accordance with the prescribed specifications and participation criteria.

Thus, the students come to **know** the requirements of the world of work and to **understand** how to adapt to it.

Emphasis is placed on the students' ability to:

6. OBSERVABLE BEHAVIOURS

Weighting of items

Numbers in the table of dimensions

60%  1) On the basis of the activities carried out during the course, identify:
– two appropriate ways of behaving in their relationship with authority (10% per way of behaving)
– four requirements of employers with respect to employees (10% per requirement)

Criterion:
– Appropriate elements identified

40%  2) On the basis of two hypothetical situations describing different problems with respect to integration into the workplace, identify:
– one means of facilitating integration into the workplace for each of the situations described (10% per means)

Give a reason for each means identified (10% per reason).

Criteria:
– Appropriate means identified
– Coherent reasons given
7. DESCRIPTION OF THE EXAMINATION

7.1 Type of Examination

The examination required for the summative evaluation can be written or oral, and consists of two parts.

**Part I** of the examination focuses on Dimension 1, and must not exceed 30 minutes. It is administered at a time deemed appropriate by the school. Students are not permitted to use course notes or other information.

**Part II** of the examination focuses on Dimension 2, and must not exceed 30 minutes. It is administered at the end of the course. Students are permitted to use course notes and other information.

It may be possible to develop more than one item per observable behaviour. In this case, the marks awarded can be divided among the items, provided that the relative weight of the observable behaviour is taken into account.

7.2 Partnership

Partners inside or outside the school may participate in the summative evaluation process.

7.3 Type of Result

The result obtained may be expressed as a “pass” or “fail,” or as a mark. The pass mark is set at 60% for the entire examination. The results must be transmitted in accordance with the rules set out in the *Administrative Manual for the Certification of Studies in General Education for Adults and in Vocational Training*.
