PROGRAM: Sociovocational Integration Services

SECTION 1.1.3: Where to Look for Work

COURSE: SVI-1007-1 Practicum: Where to Look for Work

1. INTRODUCTION

This definition of the domain for summative evaluation describes and classifies the essential and representative elements of the *Sociovocational Integration Services* program and, more specifically, of the course entitled *Practicum: Where to Look for Work* (SVI-1007-1). It is based on the program's organization guide, but should by no means replace the guide itself. It takes into account the diversity of local organizations and the implementation of local projects, while ensuring that all summative evaluation instruments are consistent with the overall program. It is an essential tool for developing summative evaluations that are in line with instructional planning.

The definition of the domain for summative evaluation is used to prepare examinations that are valid from one version to another, from year to year, and from one school board to another, taking into account the division of responsibilities shared by the Ministère de l'Éducation, du Loisir et du Sport and the school boards.

2. PROGRAM ORIENTATIONS AND CONSEQUENCES FOR SUMMATIVE EVALUATION

Orientations

- 1. "Sociovocational integration involves every dimension of the students,"* including physical, intellectual, emotional, spiritual and social dimensions. Education must target the whole person, including personal, career and social experience and goals.
- 2. "Sociovocational integration enables students to learn to learn,"* i.e. to know their own personal way of learning, realize their intellectual potential, facilitate their personal and social development and vocational integration, interact with their environment and broaden their vision of the world.
- 3. "Sociovocational integration permits students to become familiar with and to make use of the social, political and economic environment,"* i.e. to promote and use the natural network of relationships and the environment.
- 4. "Sociovocational integration is an ongoing, permanent process"* in a job market in which people are constantly evolving.

Consequences

- 1. This definition of the domain for summative evaluation takes only cognitive skills into account; socioaffective skills are dealt with by means of formative evaluation.
- 2. The evaluation should verify the students' ability to use their critical judgment, generalize their learning, seek meaning in their experiences and learning, solve problems and integrate new information.
- 3. The evaluation should verify the students' familiarity with their environment at the end of the course and their ability to use the available resources.
- 4. Taking into account the local situation, the evaluation should verify the level of correspondence between, on the one hand, the students' ability to reproduce and transfer their learning without help and, on the other hand, their choice of vocational integration training suited to their preferences, their abilities and their continuing education and training needs.

3. COURSE CONTENT

3.1 Theme

Places to look for work that they explored

 Affinity and lack of affinity with the direct and/or indirect places to look for work that they explored

3.2 Skill

Understanding

Identifying their affinity and lack of affinity with the direct and/or indirect places to look for work that they explored, and explaining their answers

TABLE OF DIMENSIONS 4.

Theme	Places to look for work that they explored
Skill	
	100%
Understanding 100%	Affinity and lack of affinity with the direct and/or indirect places to look for work that they explored
	(1) 100%

5. EXPLANATION OF THE CONTENT AND WEIGHTING

The expected outcome for course SVI-1007-1 involves a theme and skill that can be weighted according to their complexity.

The theme and skill for summative evaluation have been selected from among those considered essential for achieving the expected outcome of the course: "choose from among the places to look for work that they explore." This theme and skill have been selected and weighted in accordance with the prescribed specifications, participation criteria and second-level operational objectives.

Thus, the students come to **understand** the places to look for work that they explored.

Emphasis is placed on the students' ability to:

	Content	Explanation of Content
		Because of:
-	Identify their affinity and lack of affinity with the	- the potential for seeking meaning in their
	direct and/or indirect places to look for work	experiences
	that they explored, and explain their answers	- the use of critical judgment
		- the potential for transferring learning

The theme and skill are weighted as follows:

Theme Skill

Places to look for work that they explored 100% Understanding 100%

6. OBSERVABLE BEHAVIOURS

Weighting of items

 Ψ

Numbers in the table of dimensions

1)

60%

On the basis of three direct and/or indirect places to look for work that they explored during the practicum, identify:

- a specific affinity with each of the places explored (10% per affinity)
- a specific lack of affinity with each of the places explored (10% per lack of affinity)

On the basis of their personal characteristics and the places in question, explain why they identified each of the three affinities (10% per explanation).

On the basis of their personal characteristics and the places in question, explain why they identified one lack of affinity (10% per explanation).

Criteria:

- Appropriate affinities and lack of affinity identified
- Coherent explanations given

7. DESCRIPTION OF THE EXAMINATION

7.1 Type of Examination

The examination required for the summative evaluation can be written or oral, and must not exceed 30 minutes. It is administered at the end of the course. Students are permitted to use course notes, the observations they made during the practicum and other information.

It may be possible to develop more than one item per observable behaviour. In this case, the marks awarded can be divided among the items, provided that the relative weight of the observable behaviour is taken into account.

7.2 Partnership

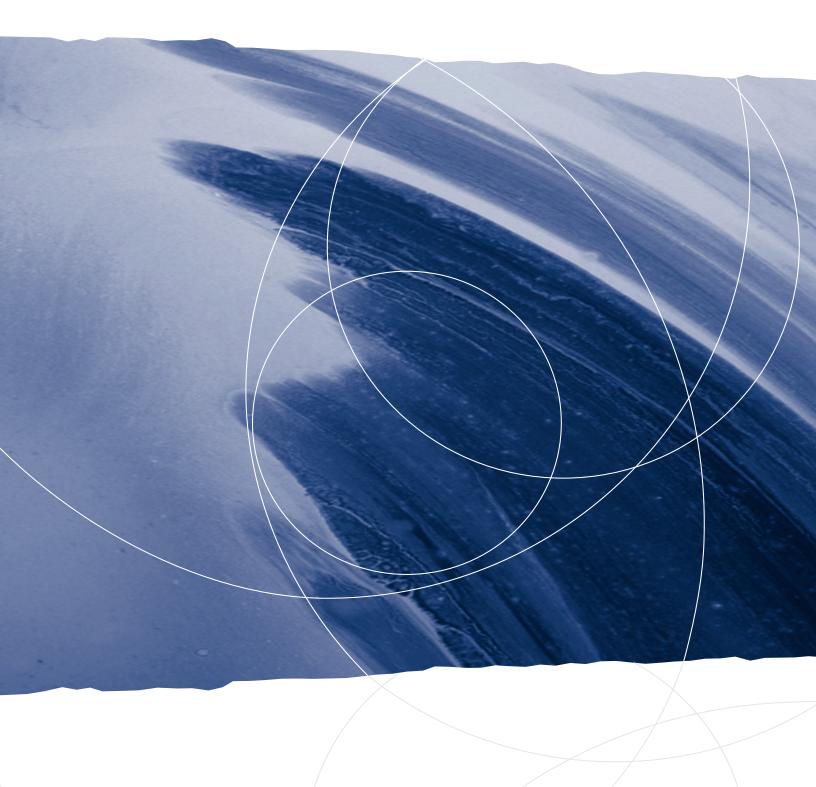

Partners inside or outside the school may participate in the summative evaluation process.

7.3 Type of Result

The result obtained may be expressed as a "pass" or "fail," or as a mark. The pass mark is set at 60% for the entire examination. The results must be transmitted in accordance with the rules set out in the *Administrative Manual for the Certification of Studies in General Education for Adults and in Vocational Training*.
