

## IDEAS FOR TARGETING ESSENTIAL LEARNING BETWEEN NOW AND THE END OF THE 2019-2020 SCHOOL YEAR

- 1 Consult the program of study and the progression of learning in order to identify the learning that should be **completed by the end of the current school year**
- 2 Determine where each of your students is with respect to the learning content covered during the current school year
- 3 First, target any content that is highlighted in bold in the progression of learning and that your students have **not yet completed**
- 4 Then, target the other learning content to be continued this year or reapplied next year.

Your objective should be to ensure that, at the end of the current school year, your students:

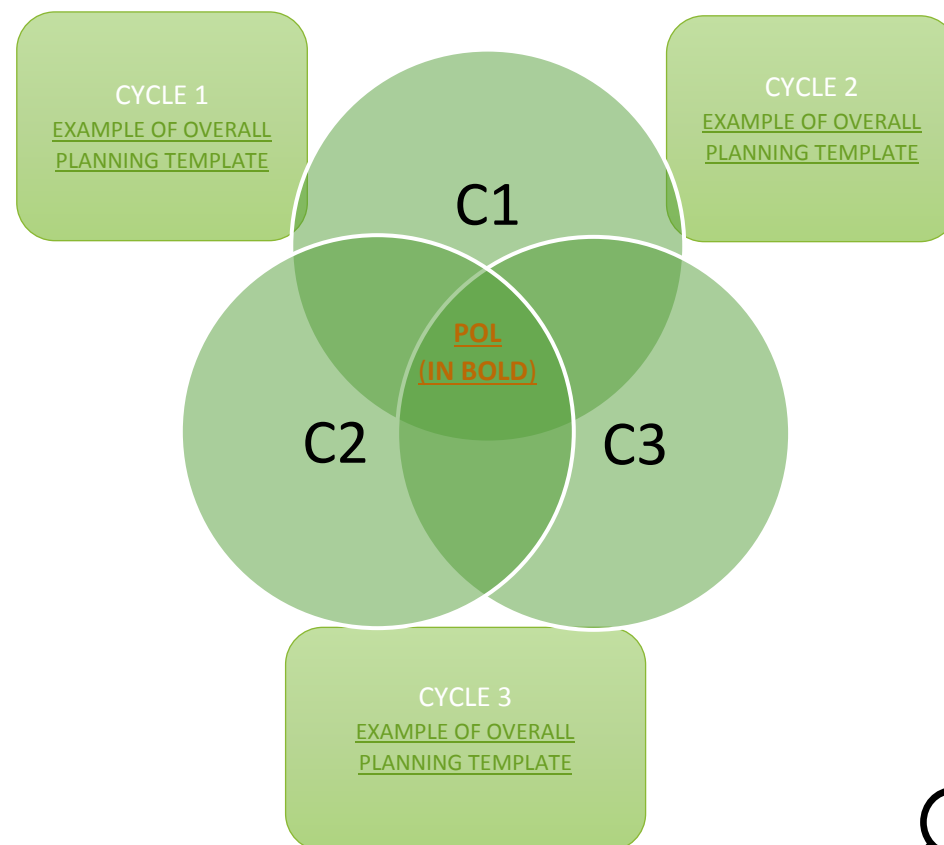

- have had an opportunity to learn a variety of things that touch on all the learning content
- have had opportunities to develop each of the competencies targeted by the program of study

### Remember that:

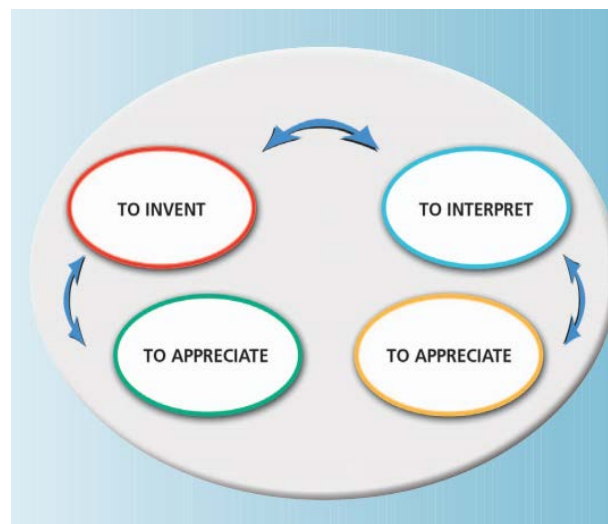

- you have the **AUTHORITY** and **PROFESSIONAL SKILLS** required to:
  - o determine your students' needs
  - o select the means to set up appropriate strategies to meet their needs in the current context
- you are in the **BEST POSITION** to determine the content, apart from the learning already acquired, that you wish to consolidate, cover in greater depth or teach your students

**The people responsible for the various programs of study in general education in the youth sector at the Ministère are available to answer your questions and to support you between now and the end of the current school year.**

### What to target

- Favour the use of a **WIDE RANGE OF WORKS** to enable students to develop their critical and aesthetic faculties while broadening their cultural horizons.
- Use the **OUTSIDE ENVIRONMENT** as a place of creation and interpretation, if necessary, while complying with the current public health recommendations regarding social distancing.
- Be **FLEXIBLE IN YOUR TEACHING** so that you can focus on specific features of the competencies. For example, consider letting students create material.
- Focus mainly on Competency 3, which has several features (examine, make connections, make a judgement, share an experience) which can be explored in **VARIOUS CONTEXTS**.
