**PROGRAM:** Sociovocational Integration Services

**SECTION 1.1.1:** Social, Political and Economic Environment (Theoretical)

**COURSE:** SVI-1003-1 Introduction to the World of Work

---

## 1. INTRODUCTION

This definition of the domain for summative evaluation describes and classifies the essential and representative elements of the *Sociovocational Integration Services* program and, more specifically, of the course entitled *Introduction to the World of Work* (SVI-1003-1). It is based on the program's organization guide, but should by no means replace the guide itself. It takes into account the diversity of local organizations and the implementation of local projects, while ensuring that all summative evaluation instruments are consistent with the overall program. It is an essential tool for developing summative evaluations that are in line with instructional planning.

The definition of the domain for summative evaluation is used to prepare examinations that are valid from one version to another, from year to year, and from one school board to another, taking into account the division of responsibilities shared by the Ministère de l'Éducation, du Loisir et du Sport and the school boards.

## 2. PROGRAM ORIENTATIONS AND CONSEQUENCES FOR SUMMATIVE EVALUATION

### Orientations

1. "Sociovocational integration involves every dimension of the students,"\* including physical, intellectual, emotional, spiritual and social dimensions. Education must target the whole person, including personal, career and social experience and goals.
2. "Sociovocational integration enables students to learn to learn,"\* i.e. to know their own personal way of learning, realize their intellectual potential, facilitate their personal and social development and vocational integration, interact with their environment and broaden their vision of the world.
3. "Sociovocational integration permits students to become familiar with and to make use of the social, political and economic environment,"\* i.e. to promote and use the natural network of relationships and the environment.
4. "Sociovocational integration is an ongoing, permanent process"\* in a job market in which people are constantly evolving.

### Consequences

1. This definition of the domain for summative evaluation takes only cognitive skills into account; socioaffective skills are dealt with by means of formative evaluation.
2. The evaluation should verify the students' ability to use their critical judgment, generalize their learning, seek meaning in their experiences and learning, solve problems and integrate new information.
3. The evaluation should verify the students' familiarity with their environment at the end of the course and their ability to use the available resources.
4. Taking into account the local situation, the evaluation should verify the level of correspondence between, on the one hand, the students' ability to reproduce and transfer their learning without help and, on the other hand, their choice of vocational integration training suited to their preferences, their abilities and their continuing education and training needs.

### 3. COURSE CONTENT

#### 3.1 Themes

- **Current conditions in the job market**
  - Rules, support measures and change factors
  - Attitudes that employers look for
  - Labour shortages and surpluses
- **Integration into the job market**
  - New possibilities in the job market
  - Obstacles to vocational integration

#### 3.2 Skills

- **Knowing**

Identifying rules, support measures and change factors related to the job market, attitudes that employers look for, and cases of labour shortages and surpluses
- **Understanding**

Identifying new possibilities in the job market and obstacles to vocational integration, and explaining their answers

## 5. EXPLANATION OF THE CONTENT AND WEIGHTING

The expected outcome for course SVI-1003-1 involves themes and skills that can be weighted according to their complexity.

The themes and skills for summative evaluation have been selected from among those considered essential for achieving the expected outcome of the course: “**learn about the job market.**” These themes and skills have been selected and weighted in accordance with the prescribed specifications, participation criteria and second-level operational objective.

Thus, the students come to **know** the current conditions in the job market and to **understand** what they need to enter the job market.

Emphasis is placed on the students’ ability to:

Content	Explanation of Content
<ul style="list-style-type: none"> <li>- Identify rules, support measures and change factors related to the job market, attitudes that employers look for, and cases of labour shortages and surpluses</li> </ul>	Because of: <ul style="list-style-type: none"> <li>- the potential for integrating new information</li> <li>- the potential for generalizing learning</li> </ul>
<ul style="list-style-type: none"> <li>- Identify new possibilities in the job market and obstacles to vocational integration, and explain their answers</li> </ul>	Because of: <ul style="list-style-type: none"> <li>- the potential for seeking meaning in their experiences and learning</li> <li>- the potential for transferring learning</li> <li>- the contribution to the process of vocational integration</li> </ul>

The themes and skills are weighted as follows:

<b>Themes</b>		<b>Skills</b>	
Current conditions in the job market	60%	Knowing	60%
Integration into the job market	40%	Understanding	40%

## 6. OBSERVABLE BEHAVIOURS

Weighting of items

Numbers in the table of dimensions

- 60% 1) On the basis of the information about the organization of work gathered during the course, identify:
- one support measure (10%)
  - one change factor (10%)
  - one rule governing the job market (10%)
  - one attitude that employers look for (10%)
  - one case of a labour surplus (10%)
  - one case of a labour shortage (10%)

**Criterion:**

- Appropriate elements identified

- 40% 2) On the basis of the different activities carried out and the information gathered during the course, identify:
- one new possibility in the job market (10%)
  - one obstacle to vocational integration (10%)

For each of the elements identified, explain your answer (10% per reason).

**Criteria:**

- Appropriate elements identified
- Coherent reasons given

## 7. DESCRIPTION OF THE EXAMINATION

### 7.1 Type of Examination

The examination required for the summative evaluation can be written or oral, and consists of two parts.

**Part I** of the examination focuses on Dimension 1, and must not exceed 30 minutes. It is administered at a time deemed appropriate by the school. Students are permitted to use course notes and other information.

**Part II** of the examination focuses on Dimension 2, and must not exceed 30 minutes. It is administered at the end of the course. Students are permitted to use course notes and other information.

It may be possible to develop more than one item per observable behaviour. In this case, the marks awarded can be divided among the items, provided that the relative weight of the observable behaviour is taken into account.

### 7.2 Partnership

Partners inside or outside the school may participate in the summative evaluation process.

### 7.3 Type of Result

The result obtained may be expressed as a “pass” or “fail,” or as a mark. The pass mark is set at 60% for the entire examination. The results must be transmitted in accordance with the rules set out in the *Administrative Manual for the Certification of Studies in General Education for Adults and in Vocational Training*.
